A general introduction and demo for fNIRS

This Methods Lunch will serve as a general introduction to fNIRS. If you have been wondering if fNIRS is applicable to your research, come find out!
I will be giving an introductory overview of fNIRS applications for cognitive research, fNIRS experimental design, and fNIRS data analysis. This methods lunch will also include a live fNIRS demo, and a walkthrough of data prep and analysis.
This lunch is geared towards those new to fNIRS. If you attended the NIRx training sessions in October, this lunch may be redundant for you, although I'm hoping to more specifically address some of our research interests.

There is no required reading for this session.
