Chemistry Teaching Assistant Job description:

In compliance with the existing provisions of the Collective Agreement between the University and the UWO-GTA Union, PSAC Local 610, the Department of Chemistry would like to inform qualified graduate students that teaching assistantship positions in the following courses may be available, subject to course and section enrollment, in the department for the Winter term. The competition is open to graduate students who are within the normal funding period, but PhD students who are less than one year beyond the normal period of funding are welcome to apply. These positions will be filled according to Article 13.06 of the Collective Agreement.

**Chemistry 1302B Resource Room.** Responsibilities include hosting problem-solving sessions in the Resource Room, assisting students one-on-one with course material, and proctoring tests and exams.

**Chemistry 1302B laboratory.** Responsibilities include demonstrating laboratory procedures, assisting students with laboratory experiments, enforcing safety regulations, marking lab reports and recording marks, and proctoring tests and exams.

**Qualifications:** Applicants must have a minimum of an undergraduate degree in chemistry, a demonstrated ability to explain challenging chemical principles, outstanding teamwork and interpersonal skills, a strong work ethic, and a positive attitude towards student learning.

**Application deadline:** January 5th 2018, or until the positions have been filled. Please send a cover letter that highlights your teaching achievements, and a resume of teaching experience, to Keith Griffiths (griff@uwo.ca), Acting Associate Chair. All applications will be acknowledged, but only the candidates selected for an interview will be contacted. Interviews for some of the positions will require the candidate to work through and present a set of chemistry problems.
