Welcome to CHEMISTRY 4472A - 2016-2017 “ADVANCED ANALYTICAL CHEMISTRY”

~ COURSE OUTLINE ~

Notice from the Registrar: Unless you have either the prerequisites for this course or written special permission from your Dean to enroll in it, you will be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites (chemistry 3372B or the former chemistry 362B, 322). 4472B and 9472B are antirequisite courses for graduate students.

Description: This joint undergraduate and graduate course encompasses selected topics at the advanced level of analytical sciences. They include simulations for electrochemistry and chromatography, analytical instrumentation and its applications to research, computer titrations, electroanalytical chemistry.

Instructor: Dr. Zhifeng Ding, Professor of Chemistry
Office – MSA 0203 (accessible from the ground floor of the corner between Chemistry Building and Biology&Geology Building to Materials Science Addition)
E-mail: zfding@uwo.ca
Secretary: Clara Fernando - In the Main Office - ChB 119 (x 86342)

Lectures: (1) Tuesday 9:30 - 11:20 a.m.  CHB 115  
(2) Thursday 9:30 - 10:20 a.m.  CHB 115

In-class labs: There are plenty in-class labs with softwares: LabVIEW, COMSOL and Excel. (Please be prompt and bring your laptop for all classes).

Office hours: Wednesdays 2:00 pm-4:00 pm in Room MSA 0203.

Chem 4472: OWL. Go to http://owl.uwo.ca/ and log in using your UWO user name and password. Check this website on a regular basis for updates and important information on the lectures, labs, tutorials.

Required materials: In-class handout and WebCT PDF materials. Several reference textbooks might be reserved in Taylor Library. Please bring a laptop in class.

Accessibility: Please contact the course instructor if you require materials in an alternate format or if you require any other arrangements to make this course more accessible to you. You may also wish to contact Services for Students with Disabilities (SSD) at 661-2111 x 82147 for any specific question regarding an accommodation.

Course evaluation: There will be two in-class midterm exams (see below for dates). The midterm exams will be
weighted 20 % each. There will be 6 assignments, each of which is 5 % worth. There will be a presentation (15 minutes, see the detail in the specific section of this outline), which is weighted 30 %.

★★ THERE ARE NO MAKE-UPS FOR LABS, OR MIDTERM EXAMS ★★

- Exams are short answer questions.

**Learning Expectations**

The course has an emphasis on the development of skills such critical-thinking, problem-solving, analysis, and quantitative reasoning; these “soft skills” are essential to success in not just chemistry but also in other courses and many occupations. Any student receiving credit for Chem 4472A will be expected to demonstrate competence in his or her ability to:

<table>
<thead>
<tr>
<th>Course-Specific Expectations</th>
<th>Soft-Skill Expectations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recognize the importance of Analytical chemistry in everyday life and the interdisciplinary nature of chemistry.</td>
<td>Analyze and critically assess problems, and take a systematic approach to solve them.</td>
</tr>
<tr>
<td>Think critically about, explain, integrate, and apply analytical principles, laws, and theories.</td>
<td>Work independently.</td>
</tr>
<tr>
<td>Examine, integrate, and assess any provided or collected chemical data.</td>
<td>Form productive and collaborative working relationships with other individuals.</td>
</tr>
<tr>
<td>Solve a variety of novel problems, both qualitative and quantitative.</td>
<td>Obtain, evaluate, and integrate information from various sources, and determine its relevance.</td>
</tr>
<tr>
<td>Draw scientific conclusions from experimental results or data.</td>
<td>Prioritize a set of tasks and manage the use of his or her time.</td>
</tr>
<tr>
<td>Use a variety of laboratory equipment and instrumentation.</td>
<td>Execute mathematical calculations accurately.</td>
</tr>
<tr>
<td>Learn a variety of experimental techniques and the theory behind them.</td>
<td>Communicate thoughts, ideas, and observations verbally and in writing.</td>
</tr>
<tr>
<td>Well utilize software such as COMSOL, LabVIEW and Excel.</td>
<td>Recognize when to seek assistance.</td>
</tr>
<tr>
<td></td>
<td>Develop respect for, and comply with, regulations and policies.</td>
</tr>
<tr>
<td></td>
<td>Learn to accept responsibility for his or her decisions, actions, and non-actions.</td>
</tr>
</tbody>
</table>
Illness and missed labs, midterm, or final project presentation:

- Failure to complete or write a homework, a midterm, or the final, will result in a mark of zero for the missed item, and potential failure in the course, unless a valid medical or compassionate reason has been approved and an exemption has been granted. The Policy of accommodation for Medical Illness can be found at https://studentservices.uwo.ca/secure/index.cfm

- For further policy information please visit http://www.uwo.ca/univsec/handbook/appeals/accommodation_medical.pdf
  (notice the underscore in accommodation_medical.pdf in the above web address).

- If you miss an item for a valid reason, present documentation to an academic counselor in your Dean's office. If your documentation is approved, the grade for that component will be re-weighed such that your mark will be based on the other items. There are no make-ups.

- The lectures and/or in-class labs are a vital part of this course. Critical scheduling and organizational information (including content, times and locations of all exams) will only be given out at the lectures. Missing a lecture where information is given out is not sufficient reason to appeal loss of marks from missed scheduled classes, problem sets, laboratory assignments or even exams. It is your responsibility to attend all lectures. If you have to miss a lecture with a valid reason, please contact Dr. Ding for missed information, and please arrange with others in the class to obtain the missed lecture notes.

- If you miss the final presentation, contact your Dean’s office to obtain an SPC form.

Anticipated behavior:

- Students are reminded of the university’s Code of Conduct found on the university website. To maintain a high standard of learning environment in our classrooms, laboratories, help rooms, and tutorial rooms for the students, those who are disruptive, rude, or show unacceptable behavior, either to the instructor, or the other students, will be asked to leave.

**Chemistry 4472A Presentation**

1. Lectures continue till Tuesday, December 6, 2016 in CHB 115.

2. The presentation will be on Tuesdays, Oct 18 and 25 9:30 -11:30 pm in room ChB 115. Everyone has to be there all the time; otherwise a penalty will be applied. In the event of illness or emergency, the usual procedures will apply.

3. The presentation will be 12 min (maximum) for each student and 3 min questions follow. The presentation event will be from 9:30 am-11:30 am on Tuesdays, October 18 and 25, 2016 in room ChB 115. The duration depends on the number of students. Coffee and treats might be provided by the department.

4. At the end of the presentation event, please return the NI USB 6008 device, the voltmeter and the tool. Otherwise, your presentation marks will not be released.
5. Choose a topic on instrumentation based on LabVIEW or on simulation based on COMSOL. You are encouraged to select a project which is related to your 4491E or graduate thesis.

The scientific level should be equivalent to chem 3372b poster, less high than your 4491 project or chem 9658 seminar for graduate student, but higher than 4472 assignments. Please come to Dr. Ding’s office to discuss your choice if needed.

For LabVIEW topic, please study the CV6008.vi I have emailed you. Basically the VI uses one of the two sub VIs I showed in class (472ai.vi) to do data acquisition (recording the electrochem current and potential, we call it as passive usage of the AD/DA converter). Note that the device number may change with your USB device (NI 6008) and your computer. It will be a bonus if you can use the AD/DA converter to drive a device using 472ao.vi. For example, switch on your light source or high voltage and then switch off, integrate the detection signals within certain time, sweep a potential etc. You should have data acquisition, data analysis and data presentation in your VI you are going to make.

Sure, you can do a simulation project with COMSOL. For instance, as we explained in the class, you can simulate a cyclic voltammogram for a species which can be reduced and oxidized. You can also simulate a voltammogram for a species which has an electrochemical reaction at the electrode and then the reduced species or the oxidized species can go for a chemical reaction (EC mechanism). As well, you can simulate analytical chromatogram for two components (A and B) while we have practiced preparative chromatograph in class. You might do a project of electrophoresis simulation but you can not just use the COMSOL examples on this topic, which were shown in our class.

The project you are going to do is by no means limited to the examples describe above.

**Highlights of the presentation**

Title and outline of your talk

INTRODUCTION describes the background to the instrument or simulation.

MATERIALS & METHODS what you prepared; what instrument you used; what you did. Might include a schematic diagram and/or photo of the instrument. Or, what is your model of simulation.

RESULTS of your measurement or simulation

DISCUSSION can be the analyzed results

- DISCUSSION OF a RESEARCH PAPER or BOOK FROM THE LITERATURE, or the present situation/problems...Summarize what was done, may be include a diagram of best results.
- REFERENCES here must be a list (short) or key references -books-research papers that you used -best to use numbers (1) etc. in the text
- ACKNOWLEDGEMENTS who helped -who you wish to thank -financial support

It is required to present a paper and it is a good idea to select a paper with topic related to your 4491
You must decide on your choice of the title by Tuesday, October 11, 2016 and e-mail to zfding@uwo.ca.
Chemistry 4472A

1. Introduction
   - Operation of the course
   - The first experiments:
   - Check your computer and software installation
   - Electronic Mail
   - Midterm Exams, the Final Exam-presentation.

2. Simulations for Electrochemistry and Chromatography
   - Introduction to COMSOL software.
   - Cyclic Voltammetry.
   - Chromatography.

3. Analytical Instrumentation
   - Introduction to LabVIEW.
   - Data acquisition.
   - Instrument Control.
   - Data Analysis

4. Presentation
   9:30-11:30 on Tuesdays, Oct 18 and 25, ChB 115

5. Computer Titrations
   - Aqueous Solutions and Chemical Equilibria.
   - Titrimetric Methods; Precipitation Titrimetry.
   - Neutralization Titrations.
   - Complexation Reactions and Titrations.

6. Electroanalytical Chemistry
   - Introduction to Electrochemistry.
   - Applications of Standard Electrode Potentials.
   - Applications of Oxidation/Reduction Titrations.
   - Potentiometry.
   - Voltammetry.
