

Treading Water: An Interdisciplinary Exploration of Water Management Issues

Thursday October 14th, 12pm – 2pm Ivey School of Business 1R40

Presented by: Ivey Centre for Building Sustainable Value and University of Western Ontario
Centre for Environment and Sustainability

You are invited to attend a cross-disciplinary panel and luncheon for faculty, post-doctoral fellows and graduate students across campus. The objective is to engage in multidisciplinary discussions about cutting-edge research in social and environmental sustainability. This is the fifth in a series of events aimed to increase our understanding of research in other disciplines, and ultimately foster greater interdisciplinary research cooperation.

Moderator: Dr. Amit Chakma, President, University of Western Ontario

12:00-12:10 Introduction: Colette Southam, Assistant Professor of Finance

12:10-12:00

1. **Science.** Brian Branfireun, Associate Professor of Biology and Canada Research Chair in Environment and Sustainability. [Will Decreasing Emissions Solve the Mercury Problem?](#)
2. **Science/Medicine.** Charlie Trick, Professor of Biology, Microbiology and Immunology and Pathology and Beryl Ivey Chair in Ecosystem Health. [Marine Ecosystem Health.](#)
3. **Engineering.** Clare Robinson, Assistant Professor of Civil and Environmental Engineering. [Water Quality and Supply Issues in Bangladesh.](#)
