Professional Practice:
Clients with Health Challenges I
N3911a
Fall 2016

Course Coordinators:
Eileen Denomy RN, BScN, MScN, DipAdEd
Carly Simpson RN, BScN
N3911a Professional Practice: Clients with Health Challenges I

Calendar description

Students will apply and integrate theory related to clients with health challenges into their nursing care of clients. Co-requisite: N3910a

Expanded description

Students will provide nursing care in hospital settings to clients and families experiencing acute illness. Through the provision of care and health promotion activities, students will refine the assessment and care skills gained in the first two years of the nursing program. Additionally, students will gain insights into clients’ experiences, the nature of acute illness, the health care system, and the functioning of interprofessional health teams.

Building on learning from all courses in the nursing curriculum, students will integrate and apply their knowledge in the provision of care and in interactions with interprofessional health team members. Clinical knowledge and judgment will develop through planning, implementing, and evaluating nursing care.

Professional practice experiences are scheduled in hospitals settings. There will be 12 hours of hospital-based professional practice per week for 12 weeks; every day on the hospital units is 12 hours. Professional practice days are Tuesdays OR Wednesdays.

Final course evaluations, between student and clinical instructor, do not occur on the hospital units during this professional practice time. Clinical instructor and student end-of-term evaluations occur the week after the last 12-hour shift and take place on campus, at the School of Nursing. Clinical instructors book rooms and schedule meeting times with each of their students.

Course Goals

1. Incorporate Clinical Judgment Model when providing strengths-based care for clients and families, and justify decisions using beginning research skills, evidence, ethical principles, and multiple ways of knowing.
2. Apply theory to health promotion and nursing care of individuals with complex health challenges.
3. Apply interprofessional concepts when providing person-centered health promotion and care for clients with complex health challenges.
4. Pursue, analyze and organize information relevant to health promotion and nursing care for clients with complex health challenges.
5. Identify policy gaps in the health care and social systems that compromise health and continuity of care for clients and families with complex health challenges.
6. Identify the ethical and professional components of health promotion and care for clients with complex health challenges.
7. Demonstrate an understanding of professional standards and competencies and best practice guidelines that underpin nursing care.
8. Demonstrate developing competency as a reflective practitioner.
Major Concepts in the course

- adverse events
- alterations in homeostasis
- caring
- circulation and tissue perfusion
- client centred care
- clients
- clinical judgment
- communication
- context/culture
- determinants of health
- endocrine balance
- evidence informed practice
- family
- fluid & electrolyte balance
- growth and development
- healing
- health
- health care system
- health promotion/ disease prevention
- holistic care
- illness
- immuno-cellular alterations
- interprofessional collaborative practice
- neuro-cognition
- personal meaning
- safety
- teaching-learning
- technology
- time and transition
- wellness

National Nursing Entry-to-Practice Competencies (CNO, 2014) addressed in the course:

Professional Responsibility & Accountability: 1, 2, 3, 4, 5, 6, 8, 9, 10, 11, 12, 13, 14, 15, 19, 20, 21, 23
Knowledge-Based Practice: 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 43, 45, 46, 47, 48, 49, 50, 52, 53, 54, 55, 57, 58, 59, 60, 61, 62, 63, 64, 67, 68, 70, 71, 72, 73, 74
Ethical Practice: 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86
Service to the Public: 88, 89(a), 90(d), 92
Self-regulation: 95, 97, 100(a,b,c,d)

Nursing Informatics Competencies (CASN, 2012) addressed in the course:

Uses relevant information and knowledge to support the delivery of evidence-informed patient care.
Uses Information and Communications Technologies (ICTs) in accordance with professional and regulatory standards and workplace policies.
Uses ICTs in the delivery of patient/client care.

Interprofessional Competencies (CIHC, 2010) addressed in the course:

Interprofessional communication: 1, 2, 3, 4, 5, 6
Patient/client/family/community centred care: 7, 8, 9, 10
Role clarification: 11, 12, 13, 14, 15, 16
Team functioning: 19, 20, 21
Collaborative leadership: 22, 23, 27, 28
Interprofessional conflict resolution: 30, 31, 32, 33, 35
**How this course will contribute to your development as a professional nurse and interprofessional team member**

Incorporating program concepts, students will have the opportunity to care for clients with complex acute and chronic health challenges. Students will develop their ability to apply relational practice, Tanner’s Clinical Judgment Model, and Strengths-Based Nursing within the hospital setting. Students will develop their ability to plan, implement and evaluate nursing care, while collaborating with the client, family, and health care team, while implementing evidence-informed practice. At the same time as developing an understanding of how hospital care is delivered, students will develop communication, leadership and advocacy skills, and develop their ability to contribute as members of the interprofessional team.

**How we will work together**

A tone of respect and support between and among students and faculty members, diligent preparation, and active participation will form the basis of professional practice. This approach will lead to an environment where student learning can flourish.

Students engage in learning activities in selected clinical settings to experience praxis (i.e., practicing an art or skill). Students work with individuals and families and the interprofessional team in providing care and promoting health and healing through the development of caring relationships. To maximize learning and to ensure safety of clients and self, students are expected to prepare for each professional practice session by:

- reading about the assigned client’s situation
- learning about medications and treatments prescribed for clients
- anticipating the theoretical concepts that will be relevant in the assigned client’s care
- completing preparatory learning activities for the hospital setting
- reviewing pertinent knowledge from previous courses

Students will be required to complete all preparation activities for safe, ethical professional practice. All students are expected to share ideas to advance their own and others’ learning, ask questions, and listen attentively. Attendance is necessary, as are respectful interactions and the avoidance of actions that will interfere with the learning of others.

Professional appearance and comportment are required in all learning experiences. Students are expected to present a professional appearance and attend agency clinical practice in their uniforms (see the appropriate section of the Undergraduate Programs Manual 2015-2016 at [http://OWL.uwo.ca](http://OWL.uwo.ca)), with a Western name pin and visible school photo identification, program crest on left sleeve, a watch, and a stethoscope. In all cases, it is expected that students will be neat and clean in appearance and that good hygiene practices will be maintained.

Faculty (i.e., Clinical Instructors) will facilitate learning, guiding students in selecting resources and actively engaging in a collaborative learning dialogue. Additional information regarding student activities and expectations is posted on OWL-Sakai.
Identification/Professional Accountability

You will be identified as Western-Fanshawe Collaborative BScN Program nursing students by the program name pin worn on the breast of your uniform, by your visible school photo identification, and by the nursing program crest sewn on the left sleeve of your uniforms. Documentation in client charts must be followed with the following signature format: initial, surname, WFN3 (Western-Fanshawe Nursing Year 3).

Textbooks and other resources

Recommended:

Opportunities to Demonstrate Learning

Professional Practice Collaborative Evaluation (PPCE)

Evaluation is an on-going process intended to provide feedback to improve one’s performance. Students are active partners in the evaluation process. Reflection on practice is to be completed electronically using the Professional Practice Collaborative Evaluation (PPCE) form. This form is available on OWL-Sakai. The process will be interactive and collaborative between Clinical Instructor and student, involving honest, open, and clear communication. Formative evaluation (occurring day-to-day, moment-to-moment) allows for learning and improvement. As the Clinical Instructor provides feedback, the student reflects on her/his experience, and incorporates feedback into practice so that course goals can be met. The student and Clinical Instructor will review the course learning goals midway through the practice rotation and document goal progress. Entries into the PPCE for the student and the Clinical Instructor will contain evidence.
of student progress in an incremental manner. The End-of-Course Summary sheet is an overall summary of student performance. Students must receive a satisfactory final evaluation in order to pass N3911a. Details about the process of evaluation and level of achievement necessary to pass the course are on the Professional Practice Collaborative Evaluation form.

The grade for this professional practice course is “P” or “F”

“P” pass (satisfactory)
“F” fail (unsatisfactory)

**Reflective Practice Reviews (RPRs)**

Three (3) to four (4) RPRs will be completed over the term. If the first three RPRs are written at a satisfactory level, the fourth RPR will not be required. The dates of submission will be as follows:

- September 29th (Tuesday placement) or September 30th (Wednesday placement)
- October 27th (Tuesday placement) or October 28th (Wednesday placement)
- November 24th (Tuesday placement) or November 25th (Wednesday placement)

The purposes of this assignment are as follows:

- evaluate and analyze your clinical performance, evaluating choices and alternatives, strengths, and areas for improvement
- incorporate scholarship and critical reflection into your practice
- demonstrate commitment to ongoing improvement in your practice

Students are expected to systematically evaluate their practice on an ongoing basis, regardless of whether or not they are submitting an RPR that week. RPRs are to be a minimum of two (2) and a maximum of three (3) pages in length, excluding the title page and references, typed and double spaced. APA 6th edition format is to be followed and citations are to be included for all references to professional nursing literature. Students are expected to incorporate a minimum of two scholarly references/publications per RPR to provide evidence and support observations and analysis. *College of Nurses of Ontario documents and RNAO Best Practice Guidelines are excellent complementary references, but will not be counted as part of the two scholarly publications required in this assignment.*

The Reflective Writing Template posted on OWL-Sakai is to be used. It is expected that students will use references outside of/in addition to what they are reading in their theory courses. Successful completion at a level of a year three student is required to pass the course. Students are encouraged to meet with the Course Coordinator if they are having any difficulty, or have questions about assignments or scholarly writing.

**Professional Practice: Self-Directed Online Maternal-Infant Modules**

When not engaged in professional practice in the hospital setting (i.e., Tuesday or Wednesday of each week), students will complete four online maternal-infant modules. Learning activities and due dates for completion of these four modules will be posted on OWL-Sakai.
The purposes of this assignment are as follows:

- to provide the theoretical knowledge necessary to prepare students for a potential practice placement caring for these types of clients in the winter term or in Year 4
- to provide theoretical content regarding this specialized knowledge in preparation for the NCLEX-RN exam
- to provide theoretical content that may be required by future employers

Policies

Students are required to read the BScN Programs Manual and be familiar with its contents. The Program Manual is available for Western students on OWL in Undergraduate Student Information (https://owl.uwo.ca).

Professional Practice Pre-placement Requirements

Students must meet pre-placement requirements before beginning all professional practice placements. No student is permitted access to any professional practice placement without completing and submitting the necessary documentation to the clearance partner by the deadline determined by the program.

In addition to pre-placement requirements, students may also be required to submit documentation for mandatory site-specific requirements, as requested, to our professional practice partners.

Western site ONLY: Failure to submit the necessary documentation and be cleared by the mandatory prerequisite deadline will result in: a hold on your academic record; an administrative fine of $100; and de-registration from the course resulting in loss of the academic term.

More information regarding requirements is available on the Western School of Nursing website (http://www.uwo.ca/fhs/nursing/practice/requirements.html) and the Fanshawe College website (http://www.fanshawec.ca/preplacement).

Attendance

Due to the significance of theoretical and practice knowledge in developing professional competence, students are expected to demonstrate professional responsibility through regular attendance at, and participation in, all scheduled learning activities. Much of the learning that takes place is a result of preparation and engagement with the material and active dialogue with colleagues and faculty. Therefore, students are expected to attend all professional practice days.

Plagiarism

Student work is expected to be original. Plagiarism is a serious academic offence and could lead to expulsion from the nursing program. You are plagiarizing if you insert a phrase, sentence or paragraph taken directly from another author without acknowledging the work to belong to him/her. Similarly, you are plagiarizing if you paraphrase or summarize another author’s ideas without acknowledging that the ideas belong to someone else. You may be asked to submit your
Electronic Devices
Electronic devices are useful in assisting with the teaching/learning process in both classroom and professional practice settings. In the classroom or praxis setting, devices should be used in a manner that is not distracting to others or oneself. In professional practice placement settings, please abide by the policies set by the agency in regards to use of social media, internet, and handheld devices. Additionally, technology use in the presence of clients or agency staff may require explanation as to its use as part of professional practice (e.g., a drug guide on a smartphone, texting your clinical instructor in the practice setting).

It is essential that client privacy and confidentiality be maintained when using electronic devices. When students and Clinical Instructors (CIs) are communicating via electronic devices, client information must not be included. Students and CIs are accountable for responsible use of electronic communication, this includes: using professional language, setting device to silent/vibrate mode in the practice setting, and refraining from personal communications when at their practice placement.

Mental Health
Students who are in emotional/mental distress should refer to the following links for a complete list of options about how to obtain help. MentalHealth@Western http://www.uwo.ca/uwocom/mentalhealth/

Student Safety
Please refer to the Undergraduate BScN Programs Manual section on Student Safety Concerns: Guidelines for Responding in the Practice Setting Environment and the Student Safety Flow Chart found on the Undergraduate Programs site on OWL-Sakai at owl.uwo.ca
