

DANGEROUS GOODS SHIPPING ALERT

Effective January 1st, 2001, a change has been made in the requirements for shipping infectious items. Shipping containers that have the following "un code" on the box are no longer acceptable. If used, your shipment will be refused by the shipping company and returned to you.

The new package requirement must have the following mark. The difference is that the new boxes will have a "4G" at the beginning of the code.

Please check your supply of infectious shipping containers and ensure that you discard any with the older code stamp. **New compliant shipping kits can be purchased through Chemistry Stores.**

If you have any questions regarding this change or if you have any other questions regarding the transportation of dangerous goods please contact the department of occupational health and safety at 661-2111 ext.88242
