

# NON-CANONICAL PREDICATION WORKSHOP

May 15—17, 2009, Room UC 142

## Workshop Focus

This workshop explores two questions, one more empirical, one more theoretical. One: is there just one canonical way to achieve predication and if so what is it or, alternatively, what are the non-canonical forms of predicating? Two: what are the larger implications, for linguistic theory and for philosophy of language, of the correct answer to the first question?

## Invited Speakers

**David Adger** (*University of London*)

**Caroline Heycock** (*University of Edinburgh*)

**Mark Baker** (*Rutgers University*)

**Wolfram Hinzen** (*Durham University*)

**Greg Carlson** (*University of Rochester*)

**Diane Massam** (*University of Toronto*)

**John Collins** (*University of East Anglia*)

**Sally McConnell-Ginet** (*Cornell University*)

**Marcel den Dikken** (*CUNY*)

**Susan Rothstein** (*Bar-Ilan University*)

**Itamar Francez** (*University of Chicago*)

## Thanks

The organizers wish to gratefully acknowledge the financial support of the following groups: Academic Development Fund, Office of the Vice-President (Research), Faculty of Arts and Humanities, Canada Research Chair in Linguistics, Language and Cognition Research Group, Department of French Studies and Department of Philosophy

## Organizers

**Ileana Paul** ([ileana@uwo.ca](mailto:ileana@uwo.ca)) & **Robert J. Stainton** ([rstainto@uwo.ca](mailto:rstainto@uwo.ca))
