Postdoctoral Position in Tumor Immunology

A postdoctoral position is available in the laboratory of Dr. Mansour Haeryfar at Western University in London, Ontario, Canada. The research to be conducted is funded by Prostate Cancer Canada (PCC) and will explore novel T cell-based strategies for immunotherapy of prostate cancer. Our lab is interested in the role of CD8+ cytotoxic T cells and natural killer T (NKT) cells in antiviral immunity and in anti-tumor immune surveillance and their manipulation towards more effective immunotherapeutic applications. For a general description of our areas of research, visit the following website: http://publish.uwo.ca/~mhaeryfa/

The ideal candidate has a PhD, MD (or equivalent), and is well-versed in various immunological techniques, including but not limited to flow cytometry. Additional background in molecular biology and experience in mouse models of cancer are preferred. The candidate should have strong interpersonal skills and be able to work both independently and as an effective member of a dynamic team.

Western University is one of Canada’s top research-intensive universities. London is located midway between Toronto and Detroit and is known as the "Forest City" (see www.goodmovelondon.com). Salary will be competitive and commensurate with experience and sought expertise.

Review of applications will begin immediately and continue until the position is filled. Only shortlisted candidates will be contacted.

Applicants should submit (preferably by e-mail) their curriculum vitae, a brief statement of research interests, and names and contact information of three references to:

Dr. S.M. Mansour Haeryfar
Canada Research Chair in Viral Immunity & Pathogenesis
Associate Professor
Department of Microbiology & Immunology
