"An Encounter with Simone Weil"

followed by a Q&A with Director Julia Haslett

What response does seeing human suffering demand of us? Filmmaker Julia Haslett seeks an answer in the controversial French thinker and activist Simone Weil (1909-1943), whose life and work took on this question in a dramatic way. *An Encounter with Simone Weil* explores the issue of moral responsibility and personal action against the backdrop of 21st-century America. Using Weil's writings and teachings as a framework for her own experience, Haslett creates a moving portrait of an extraordinary young woman whose decision to live by her convictions proved that the quest to live a principled life is a journey we should all consider taking.
