Print Form

Date of Interruption/Closure February 23, 2016 (First of two outages)

Time(s): 5:00am - 7:30am

Building(s) #1 SPENCER ENGINEERING BLDG (SEB)

#2 WIND TUNNEL (BLWT) Load restrictions until the morning of February 25

Affected: #3 DOES NOT INCLUDE CLAUDETTE MACKAY LASSONDE PAVILLION (CMLP)

#4

Areas/Rooms Affected Alternate Route/Service:

All of Spencer Engineering will be without power for the duration of this outage. Emergency power will be available including power to the fire alarm system.

Service to be interrupted: #1 Electrical Power

#2 HVAC systems/Fumehoods on normal power will be off.

#3 Elevator

#4

Description/Reason for Project:

The project will provide two new 400 amp 5000 volt feeders to support the Spencer Engineering, Claudette MacKay-Lassonde Pavilion, Elborn College, Boundary Layer Wind Tunnel, Western Student Rec Centre and Thompson Engineering Buildings. The work will increase the electrical system capacity and improve the system resiliency by way of making alternate sources of supply available.

Notes: At the end of this outage, all buildings in this area will be on one feeder out of the South Substation. This will require electrical load conservation measure in the area and most importantly in the BLWT. These conservation measure will be required until mid-morning on Thursday February 25th.
