Description/Reason for Project:

In preparation for the new sprayed fireproofing that is set to happen on Friday 19th, the contractor will prepare the area for this work. They must attach wire mesh to the structural steel. This involves 'shooting' pins into the steel to hold the mesh. This will be noisy, with gunshot type 'bangs' heard primarily on the 5th, 6th & 7th floors, but may be heard in other areas of the building.
