

## **GABAE Development Information Session (Internship Students)** **Tuesday, January 26, 2010, 6:00 pm - 7:30 pm**

Approved Internship students from BMOS, Science and Engineering are invited to join us for an information session at Western on Tuesday, January 26th as we discuss what we are looking for in an intern and what it is like to work for GABAE Development.

From their site:

*'Incorporated in 2007 GABAE has grown at a phenomenal rate. Gabae has Chemists (organic, environmental, catalytic and polymer), Mechanical Engineers & Designers, Materials Specialists, IT Systems Engineers, Machinists, Electronics Engineers as well as the support of local professors and students working on a wide range of high-tech projects...*

*Because GABAE develops new technologies that are proprietary, much of the specific activities that take place when in the firm cannot be disclosed in the public domain."*

Many representatives from GABAE will be here to speak with students, including our 2 current internship students who have been with us since May 2009.

This session will take place in Spencer Engineering Building, Room 2202 at 6:00pm and refreshments will be provided.

We look forward to meeting you!

Location SEB 2202

You can sign up for this session on Careercentral, under "Events"
