

## Department Research Cluster Development Fund

The 2013 Retreat identified the following departmental collaborative research clusters – Aging, Movement and Migration, Food and Agriculture, Water, Insects and Global Change (although it is recognized that global change is a “cross-cutting” cluster). A “Department Research Cluster Development Fund” has been established – funds up to \$500 (depending on number of participants) are available to host a cluster event (up to one per cluster per year) – to host a lunch associated with a workshop that will bring together internal and external groups interested in the cluster.

Applicants should include the following information:

Name of research group (can be one of those identified at 2013 Retreat something new)

Funding Request (maximum of \$500, expected to be in the range of \$250)

Proposed topic:

Proposed venue:

Expected Biology faculty participants (number and names):

Expected other department/faculty/university faculty participation (number and names):

Expected industry/government/NGO participation (number and names):

**First Application Deadline: January 31**

**Electronic submission: pdf format, sent to Hillary Bain (hbain2@uwo.ca)**
