Postdoctoral Position: Plant Metabolomics & Plant-Mite Interaction

A postdoctoral position in Plant Metabolomics and Plant-Mite Interaction is available starting January 2020. The position is for one year, with option to renew for up to two additional years. The successful candidate will join a multidisciplinary research team in the discovery of biopesticides from plants and their application to crop protection against spider mites. Our team is committed to employment equity and diversity in the workplace and welcomes applications from women, members of racialized groups/visible minorities, Aboriginal persons, persons with disabilities, persons of any sexual orientation, and persons of any gender identity or gender expression.

To be eligible, applicants must hold a Ph.D. in plant biology, chemistry, biochemistry or a closely related field, and must have extensive experience in the use of HPLC-MS for the analysis of small molecules. Preference will be given to applicants with some experience with metabolomics analysis, and/or NMR spectroscopy. To apply, please send a cover letter, CV, and the names of three references via e-mail to Prof. Mark Bernards (bernards@uwo.ca) and Vava Grbic (vgrbic@uwo.ca). Applications will be evaluated until the position is filled.
