

# How to cope in a double major

Biology and Medical Sciences

Bio (6.0) overlap (2.5) MedSci (6.0)

This combination does not lead you to 4<sup>th</sup> year courses. Wanting to pursue a Masters Program?

There is **not enough background** in either discipline to impress a supervisor.

Honors Double Major requires 1.0 from the 3000 level from each module and appropriate marks for each module.

## Biology

- 4.0 from the core
- 2.0 from the list of Biology courses. 0.5 can be a medsci. 4<sup>th</sup> year courses are restricted to honors spec. but may be used if space.

## Medical Science

- 3.0 from the foundation courses
- 3.0 from the list of appropriate 2<sup>nd</sup> and 3<sup>rd</sup> year MedSci. 4<sup>th</sup> year courses with permission only. Honors double majors.

2.5 overlapping: 1.0 of the highest marks will be double counted. 1.5 must be “replaced” **0.5 must be from Biology, 0.5 must be medsci, the remaining 0.5 can be from either module.**

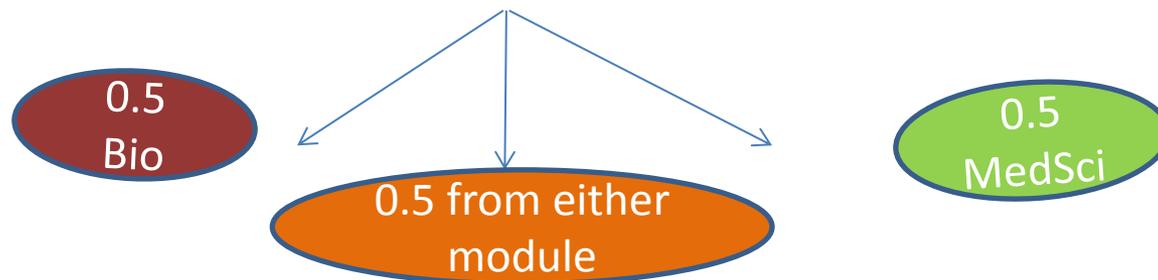

# Where does the 2.5 come from?

## Biology Core Courses

- Biochemistry 2280A
- Chemistry 2213A
- Biology/Stats 2244A/G
- Biology 2290F/G
- Biology 2382B, 2483A, 2581B
- and 2601A.

## Medical Sciences Fdn. Courses

- Biochemistry 2280A
- Chemistry 2213A and 2223B or appropriate chemistry.
- Biology/Stats 2244A/B
- 1.0 from Biology 2290F/G, 2382B and 2581B.

Of the 2.5 common credits, 1.0 will be double counted.  
1.5 credits must be taken.
