Western Centre for Brain and Mind - Fee Structure for Non-Member Users

All room/equipment/parking fees are captured by the Facility Booking Calendar, which is used to reserve rooms/equipment/parking. Printing is captured by dedicated codes issued to labs. Lab Member counts are tracked by a Personnel database maintained by the WCBM. Any Additional Services are negotiated ad hoc between users and Facility staff.

**** If a piece of equipment is being used for a meeting or for piloting, there will be a 50 % discount applied.

****If a researcher purchased equipment from their own awarded grant, the researcher will (by default) not be charged the Equipment Usage Fee for that particular piece of equipment. With this 100% discount in place, the researcher will be responsible for covering maintenance, repairs and parts replacement, as well as consumables. This discounted rate does not apply to group grants such as the CFI Infrastructure Grant.

3) Parking: \$10 / hour / parking spot

4) Lab Members: \$800 / member / year

5) Service Fees: 85 \$/hr. Staff technicians and the facility manager aid trainees in the design of research studies, troubleshoot during piloting and data collection, and support data analysis. Staff members use a time tracking app (Clockify) to track interactions with trainees and quantify the time spent on each activity. The rate for these services for external users is \$85/hour. If staff are

called in to fix a problem during regular testing, there will typically be no charge (i.e., equipment malfunction).

If it is more expedient to charge part-salary (rather than hours), then assume a 37.5-hour week and a 52-week year. For example: 5% salary (~97.5 hours) would be \$8287.50.

- 6) Printing:** The funding source which paid for the printer lease has recently ended. As a result, per page printing costs are expected to increase slightly from your previous printing bills.
