

YELLOW FEVER

THE STORY BEHIND THE SYNTHESIS OF GERMASILENES

K.M. Baines

Department of Chemistry, University of Western Ontario, London, Ontario
N6A 5B7

The thoughts, approaches, experiments and the personalities which lead to the synthesis of germasilenes will be reflected upon.

What were we thinking when we started this project?

The design of the precursor: Travels down a forgotten path.

A phone call one afternoon.

The excitement of discovery: Serendipity does play a role.

The ignorance of the young.
