Prerequisite Requirements

Unless you have either the prerequisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites. The prerequisite for this class is either the combination of Chem 2273A and 2283G, or Chem 2213A and 2223B.

Accessibility

Please contact the course instructor if you require lecture or printed material in an alternate format or if any other arrangements can make this course more accessible to you. You may also wish to contact Student Accessibility Services at 519-661-2147 if you have questions regarding accommodation.

Support Services

Learning-skills counsellors at the Student Development Centre (http://www.sdc.uwo.ca) are ready to help you improve your learning skills. They offer presentations on strategies for improving time management, multiple-choice exam preparation/writing, textbook reading, and more. Individual support is offered throughout the Fall/Winter terms in the drop-in Learning Help Centre, and year-round through individual counselling.

Students who are in emotional/mental distress should refer to Health and Wellness (https://www.uwo.ca/health/mental_wellbeing/index.html) for a list of options about how to obtain help. Crisis contact information is available at https://www.uwo.ca/health/crisis.html.

Additional student-run support services are offered by the USC, http://westernusc.ca/your-services/.

The website for Registrarial Services is http://www.registrar.uwo.ca.

Course Website

News and updates will be posted on OWL (http://owl.uwo.ca). This is the primary method by which information will be disseminated to everyone in the class. Please remember that it is your responsibility to check OWL on a regular basis.
Class and Instructor Information

If you find yourself not understanding the lectures, assigned readings, or problems, please set up an appointment with me by sending me an email from your Western email account. Questions related to course material can also be posted on the OWL discussion board.

Please note that there is no class on Monday, April 1, and Wednesday, April 3.

Anticipated Topics

Medicinal chemistry is a broad topic that spans many disciplines. Because this is a chemistry course, we will focus primarily on the chemical aspects of drugs and less on the biological aspects. The approximate topic coverage is listed below, although it may change if there are new developments in the field that are worth discussing.

- Drugs and the body (textbook chapters 1 to 11)
  - What are drugs?
  - What are the common drug targets?
  - Why do they work?
  - How are drugs transported and metabolized?
- Discovery and optimization (textbook chapters 12–15 and 18)
  - Generation of lead compounds
  - Optimization of pharmacodynamics and pharmacokinetics
  - Importance of metabolic studies and chemical & process development
  - Quantitative structure-activity relationships
- Selected topics (time-permitting; various textbook chapters and supplemental information)
  - Natural products and derivatives #1: antibiotics (e.g. β-lactams, macrolides)
  - Natural products and derivatives #2: opioids (e.g. morphine, heroin, fentanyl)
  - Pesticides, chemical weapons, acetylcholine, and Alzheimer’s Disease
  - One chemical family, two classes of drugs: tropane alkaloids (e.g. cocaine, atropine)
  - Serendipity in drug discovery: sildenafil

A small amount of time is allocated to the discussion of biological and biochemical topics that are essential to the understanding of medicinal chemistry.
Course Materials

The textbook’s website, which has a collection of student resources, such as additional practice questions, is https://global.oup.com/uk/orc/chemistry/patrick6e/. No access code is required. Note that the publisher is in the process of updating the questions for the 6th edition, so in the meantime, you will be redirected to the site for the 5th edition.

Learning Outcomes

Broadly speaking, a student receiving credit for the course will be expected to demonstrate competence in their ability to:

- Describe the role of medicinal chemists and chemistry in drug design.
- Think critically about, explain, integrate, and apply chemical principles, laws, and theories.
- Solve a variety of novel problems, both qualitative and quantitative.
- Draw scientific conclusions from experimental results or data.
- Examine, integrate, and assess any provided or collected chemical data.
- Communicate scientific thoughts and ideas in writing.
- Obtain, evaluate, and integrate information from various sources, and determine its relevance.
- Analyze and critically assess problems, and take a systematic approach to solving them.
- Prioritize a set of tasks and manage the use of time.

Evaluation

Components

Tests and exams are necessary to assess your mastery of core concepts. The overall course grade, out of 100, will be calculated as listed below. Listed next to the respective components are their maximum contributions toward the course grade.

<table>
<thead>
<tr>
<th>Component</th>
<th>Notes</th>
<th>Normal Value</th>
<th>Test 1 Missed</th>
<th>Test 2 Missed</th>
<th>Tests 1+2 Missed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Test #1</td>
<td>Saturday, Feb. 9, 7:00–8:00 pm</td>
<td>25</td>
<td>--</td>
<td>25</td>
<td>--</td>
</tr>
<tr>
<td>Test #2</td>
<td>Friday, Mar. 15, 6:00–7:00 pm</td>
<td>25</td>
<td>37.5</td>
<td>--</td>
<td>--</td>
</tr>
<tr>
<td>Final Exam</td>
<td>Cumulative three-hour exam scheduled by the Registrar</td>
<td>50</td>
<td>62.5</td>
<td>75</td>
<td>100</td>
</tr>
</tbody>
</table>
To be fair to everyone in the class, none of the components will be “dropped,” and it is not possible to have the components reweighted unless they were legitimately missed.

No electronic devices may be in your possession during tests and exams.

Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at this website: http://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_undergrad.pdf.

Computer-marked, multiple-choice tests and exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate cheating.

Missed Test or Final Exam

Western’s policy on academic accommodation for illnesses, as well as the Student Medical Certificate, can be found at http://www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_illness.pdf.

If you are seeking academic accommodation because of a medical (physical or mental) illness, please begin by contacting the Academic Counselling Office of your home faculty (or affiliated college).

If you are a science student, the Academic Counselling Office of the Faculty of Science is located in NCB 280, and can be contacted at 519-661-3040 or scibmsac@uwo.ca. Their website is https://www.uwo.ca/sci/counselling/.

Please note that there are no make-up tests. If your faculty’s Academic Counselling Office has approved your circumstances, the value of the missed test will be reallocated as described on the previous page.

If you miss the Final Exam, contact your faculty’s Academic Counselling Office as soon as possible. They will assess your eligibility to write the Special Exam in May.

You may also be eligible to write the Special Exam if you are in a “Multiple Exam Situation” (see http://www.registrar.uwo.ca/examinations/exam_schedule.html).
