Earth Sciences 4460a. Clastic and Carbonate Facies & Environments

Instructor: Dr. A. G. Plint. Rm 1072, BGS, <u>gplint@uwo.ca</u>, 519-661-3179.

Lectures: Two lecture hours per week; Tuesday, Thursday, 9:30-10:30, STVH (Stevenson Hall)

Room 3101.

Labs: 3 laboratory hours per week; Tuesday, 2:30-5:30 BGS 1065.

Prerequisites: ES 2260a/b, ES3314a/b, or permission of the Department.

"Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites."

Syllabus. The emphasis of this course will be on *sedimentary environments*, the *processes* that characterize them, and the *sedimentary rocks* that result from those processes. As with most other fields of geology, "*the present is the key to the past*", and with this in mind, I will attempt, as far as possible, to discuss ancient sedimentary environments (represented by rocks) in terms of **modern** settings and processes.

Labs. Some stratigraphic problems will be set during lab time. These will be based on subsurface information (logs, cores), and will provide an introduction to log and core interpretation, and some of the principles of Sequence Stratigraphy. At the end of the course, you will complete an exercise that further develops the principles of sequence stratigraphy and the construction of a chronostratigraphic chart. The distribution of facies and environments with respect to relative sea level changes will be discussed. Most lab time will be 'free', - allocated to preparation of two term papers.

Field Trip If at all possible (funds permitting) I will organize a field trip to enable us to get some 'hands on' experience describing and interpreting sedimentary rocks. A brief report on this trip will be required and will constitute 20% of the course mark.

Term Papers. Two papers will be prepared during the course. These will be limited to **eight** text pages each, plus relevant illustrations, captions and references, and will involve a literature review of a variety of topics. A few key references will be given as the basis for each paper. Two of the lab slots will be used as seminar sessions, when each student will present her/his essay to the group, and be prepared to discuss and elaborate ideas. Each paper will be worth 20% of the total course mark. Papers should include a brief (200 word) but informative Abstract; and a brief list of Conclusions. References and Figures must be keyed to the text. The second paper will involve review by your peers before submission for grading. Your efforts both as a reviewer and as an author will be taken into account in the grading scheme. Additional details will be provided separately. Papers must be supplied as hard copy and also in pdf format for possible checking with *Turnitin* software (see 'Academic Offenses' below).

Earth Science 4460a Course Syllabus

Mid-Term Test. There is *no* formal mid-term test in this course.

Final Exam. The final exam will be of two hours, and will involve essay-type answers to questions spanning the entire range of topics covered in the course. Needless to say, relatively brief, clearly-discussed answers, (with due attention to spelling and grammar) are more likely to result in good marks than a random regurgitation of disconnected facts! The final exam will constitute 40% of the course mark.

Course Materials

Main Text: *Facies Models: Response to Sea Level Changes* (4th. Edition, 2010) Edited by R.W. Dalrymple and N.P. James. Geological Association of Canada. A very readable, basic introduction to sedimentary environments and facies models. Essential reading for this course.

Recommended reading (not purchase) *Sedimentary Environments: Processes, Facies & Stratigraphy* (3rd. Edition, 1996) Edited by H.G. Reading. Blackwell Scientific Publications. ISBN 0-632-03627-3. (A very comprehensive review of all major sedimentary environments).

Evaluation

Two Term Papers (40%); Field Trip report (20%) Final Exam. 40%

Learning Outcomes:

Upon successful completion of this course, students will be able to:

- 1. Identify physical sedimentary structures in order to describe and interpret successions of clastic sedimentary rocks in terms of their depositional environment.
- 2. Apply prior knowledge of the biogenic components of carbonate sediments, in conjunction with knowledge of physical sedimentary structures, to analyse, describe and interpret successions of carbonate sedimentary rocks in order to deduce depositional environments.
- 3. Conduct practical description, illustration, analysis and interpretation of sedimentary rock successions observed in the field.
- 4. Review and analyse selected research papers in order to synthesize and integrate current ideas on selected topics in sedimentary geology; present the review in the style of a formal scientific paper, and also in a conference-style oral presentation.

Academic Offences:

"Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following Web site: http://www.uwo.ca/univsec/handbook/appeals/scholoff.pdf ."

"All required papers may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently

between The University of Western Ontario and Turnitin.com (http://www.turnitin.com)."

Absence from Exams

If you are unable to meet a course requirement due to illness or other serious circumstances, you must provide valid medical or other supporting documentation to the Dean's office as soon as possible and contact your instructor immediately. It is the student's responsibility to make alternative arrangements with their instructor once the accommodation has been approved and the instructor has been informed. In the event of a missed final exam, a "Recommendation of Special Examination" form must be obtained from the Dean's Office immediately. For further information please see:

http://www.uwo.ca/univsec/handbook/appeals/medical.pdf

Accommodation due to Illness

A student requiring academic accommodation due to illness, should use the Student Medical Certificate when visiting an off-campus medical facility or request a Records Release Form (located in the Dean's Office) for visits to Student Health Services.

The form can be found here:

www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_illness.pdf (which includes a link to the Student Medical Certificate)

Emotional/Mental Health Distress

Students who are in emotional/mental distress should refer to Mental Health@Western http://www.uwo.ca/uwocom/mentalhealth/ for a complete list of options about how to obtain help.

Accessibility

Please contact the course instructor if you require material in an alternate format or if you require any other arrangements to make this course more accessible to you. You may also wish to contact Services for Students with Disabilities (SSD) at 661-2111 x 82147 for any specific question regarding an accommodation.

www.uwo.ca/univsec/pdf/academic policies/appeals/accommodation disabilities.pdf

Support Services

Students who are in emotional or mental distress should refer to mental Health@Western http://www.uwo.ca/uwocom/mentalhealth/ for a complete list of of options about how to obtain help.

Registrarial Services are available at : http://www.registrar.uwo.ca/, and Student Support Services are listed at http://www.registrar.uwo.ca/, and Student Support Services are listed at http://westernusc.ca/services/

Religious Holidays

Please see this link for University policy on accommodation for Religious Holidays. www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_religious.pdf

Approximate Schedule of Events

Week	Date	Topic	Lab Topic
1	Sept 7	No Class – Instructor on 4450y trip	-
2	11 Sept	Introduction to course, Facies principles	Lab lecture 1 hr, Lab: Facies and time lines
	12 Sept	Intro to carbonate environments	
	14 Sept	Peritidal carbonate environments	
3	18 Sept		Lab: ½ Log correlation; ½ Paper prep time
	19 Sept	Carbonate shelves and reefs	
	21 Sept	Platform margins, slopes and deep water environments	
4	25 Sept		Lab: Paper prep time
	26 Sept	Fluvial systems – braided rivers	
	28 Sept	Fluvial systems – meandering rivers	
	29 Sept - Oct 1	Planned weekend field trip: details TBA	
5	Oct 2		Lab: Prep of Field Report
	Oct 3	Fluvial systems - floodplains	
	Oct 5	Fluvial systems – anastomosed rivers	
	Oct 6	•	Field Report due, 5 pm, hard copy.
6	Oct 9- 13	Fall 'Reading Week'' – No Classes. Paper #1 due 5 pm, 13 Oct via email in pdf format.	1 st paper due, Oct 13.
7	Oct 16	Presentation of paper #1, 10 minute talk by each student.	Paper #1 Presentation Oct 16 th .
	Oct 17	Deltas – wave-dominated	
	Oct 19	Deltas – tide-dominated	
8	Oct 23		# 2 Paper preparation
	Oct 24	Eolian environments	
	Oct 26	Wave-dominated clastic shelves - coasts	
9	Oct 30		Paper Preparation
	Oct 31	Clastic shelves – offshore sediment transport	
	Nov 2	Tide-dominated coasts	
10	Nov 6		Paper Preparation
	Nov 7	Tide-dominated shelves	
	Nov 9	Deep-water systems - processes	Deliver 1 st draft of Paper # 2 to peer reviewer, 09:30.

Earth Science 4460a Course Syllabus

	*	
Nov 13		Reviews due;
		Revision of Paper #2.
Nov 14	Deep-water – submarine fan models	
Nov 16	Principles of sequence stratigraphy – key surfaces	
Nov 17	Revised Paper # 2 due 5 pm via email in pdf format	2 nd Paper due
Nov 20	Presentation of Paper #2, 10 minute talks.	Paper #2 presentation
Nov 21	Sequence stratigraphy – systems tracts	
Nov 23	Sequence stratigraphy - chronostratigraphy	
Nov 27		Lab: Sequence strat &
		chronostrat exercise
Nov 28	Trace fossils – burrowing behavior (ethology)	
Nov 30	Trace fossils – ichnofacies concepts	
Dec 4		Wrap up seq strat
		exercise if necessary;
		Trace Fossil examples
Dec 5	Open class, review session if requested.	
Dec 7	No class anticipated.	
	Nov 14 Nov 16 Nov 17 Nov 20 Nov 21 Nov 23 Nov 27 Nov 28 Nov 30 Dec 4	Nov 14 Deep-water – submarine fan models Nov 16 Principles of sequence stratigraphy – key surfaces Nov 17 Revised Paper # 2 due 5 pm via email in pdf format Nov 20 Presentation of Paper #2, 10 minute talks. Nov 21 Sequence stratigraphy – systems tracts Nov 23 Sequence stratigraphy - chronostratigraphy Nov 27 Nov 28 Trace fossils – burrowing behavior (ethology) Nov 30 Trace fossils – ichnofacies concepts Dec 4 Dec 5 Open class, review session if requested.
