

SPECIAL SEMINAR

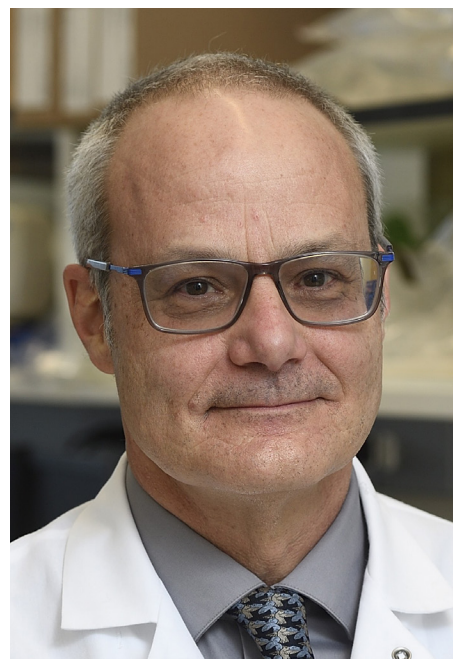

Dr. Oliver Laeyendecker

Oliver Laeyendecker, MS, MBA, PhD

Epidemiologist, IHSS/LIR/NIAID/NIH

Associate Professor, Infectious Diseases, SOM/JHU

Associate Professor, Epidemiology, JHSPH

Thursday, November 12, 2024

12:00 p.m. - 1:00 p.m.

Virtual Session, (Zoom Only)

“The Molecular Epidemiology of HIV in Rakai Uganda”

Dr. Laeyendecker has over three decades of experience in infectious disease research, with major contributions to HIV epidemiology, incidence testing, viral transmission, and population health. As Director of the HIV Incidence CORE for the HIV Prevention Trials Network, he has played a leading role in developing and validating innovative approaches to measuring HIV incidence worldwide. His research has also expanded to emerging infectious diseases, including SARS-CoV-2, with important contributions to serology, immunity, and epidemiologic surveillance. Dr. Laeyendecker is an internationally recognized investigator with nearly 300 scientific publications and numerous awards for scientific performance, innovation, and mentorship.
