2010-11 Scholarship Report

2010-11 FACULTY OF HEALTH SCIENCES LEADERSHIP TEAM

W. James Weese, PhD – Dean

Jan Polgar, PhD – Associate Dean (Scholarship)

Margaret Cheesman, PhD – Acting Associate Dean (Programs)

J.B. Orange, PhD – Director, School of Communication Sciences and Disorders

Marita Kloseck, PhD – Director, School of Health Studies

Earl Noble, PhD – Director, School of Kinesiology

Mary-Anne Andrusyszyn, PhD – Director, Arthur Labatt Family School of Nursing

Angela Mandich, PhD – Director, School of Occupational Therapy

Tom Overend, PhD – Director, School of Physical Therapy

Pamela Houghton, PhD – Chair, Graduate Program in Health & Rehabilitation Sciences

ABOUT THE FACULTY

The Faculty of Health Sciences was established in 1997 when the Faculties of Nursing, Kinesiology and Applied Health Sciences merged to become the Faculty of Health Sciences. The result was a dynamic and exciting new faculty comprised of five Schools and two interdisciplinary programs

Today, the Faculty includes six schools – Communication Sciences and Disorders (Audiology, Speech-Language Pathology), Health Studies, Kinesiology, Nursing, Occupational Therapy and Physical Therapy – as well as one interdisciplinary graduate program – Health & Rehabilitation Sciences.

Our mission is “to lead in the generation and dissemination of knowledge in the areas of health and health care, rehabilitation, physical activity and sport”. We are also committed to offering the best student experience among Canada’s leading research-intensive universities.

STATISTICS

3,122 Undergraduate students

719 Graduate students

130 Full-time faculty members

78 Staff

64 Graduate and undergraduate degrees, modules, diplomas and certificates

RESEARCH CENTRES

- National Centre for Audiology
- Canadian Centre for Activity and Aging
- International Centre for Olympic Studies

SCHOOLS

- Communication Sciences and Disorders
- Health Studies
- Kinesiology
- Nursing (Arthur Labatt Family School of)
- Occupational Therapy
- Physical Therapy

INTERDISCIPLINARY GRADUATE PROGRAM

- Health & Rehabilitation Sciences

ACTIVITY-BASED PROGRAMS

Western Sport & Recreation Services

- Mustang Athletics
- Campus Recreation

It is with tremendous excitement that I present the 2010-11 edition of the Faculty of Health Sciences Scholarship Report, which benchmarks the impactful research being carried out in our Faculty and speaks to the productivity of our researchers.

Our graduate programs – offering both disciplinary and interdisciplinary learning opportunities – are attracting a strong cohort of students each year. These students are drawn to Western by the quality and intensity of our research and are vital to our continued success in the area of discovery.

Our researchers are winning the most prestigious research awards Western offers and are receiving research funding from SSHRC, NSERC, CIHR and CFI, in addition to private agencies like the Heart and Stroke Foundation, the Alzheimer Society of Canada and AUTO21. The strategic addition of new professors and staff members only serves to increase the quality of research we are conducting.

Special thanks to Jan Polgar, Associate Dean - Scholarship and Gordon MacDonald, our Research Officer, for their hard work in facilitating and advancing the research activities of the Faculty. Our Research Mentors also deserve a great deal of credit for their contributions in reviewing grants and supporting our research efforts. These efforts make a difference and help our success rates exceed the national averages.

Most importantly, I would like to thank our professors, staff members, postdoctoral fellows and students for their committed efforts in advancing research excellence within the Faculty.

Research and education in areas related to health sciences have never been more important than they are today. With an aging population and the cost of health care services on the rise, the discoveries being made in our Faculty are well positioned to impact the future of our community and our country.

Yours in Health Sciences,

W. James Weese, PhD
Dean, Faculty of Health Sciences

This publication provides an annual opportunity to look back at all that was accomplished during the previous academic year, and again this year, I am delighted by the quality and breadth of the scholarship that continues to be produced by our faculty members.

The research carried out in the Faculty of Health Sciences is of vital importance to Canadians of all ages and situations and spans from understanding health-related issues at the cellular and body systems level to applied research that impacts the health of Canadians at home and in the community.

This document highlights the continued strong success rate of our researchers in securing grants from all of the major granting agencies and other funding organizations. It also demonstrates the contributions that the research of our faculty, graduate students, research associates and staff make to our respective disciplines and wider scholarly community.

It is always exciting to see the strong contributions of our graduate students. The students' contributions are noted throughout with underlining. It is impressive to see the level of involvement that our students have in scholarly activities. We are also seeing an increasing number of postdoctoral scholars who are adding to our research.

I extend my sincere appreciation to Gordon MacDonald who does the majority of the work to prepare this document. Gord works very hard to capture all the scholarly activity of our faculty in each year. Thank you also to Administrative Assistants Linda Brown and Jamie Karp for their assistance and to Jess Bechard, our Communications Officer, for his contribution and expertise.

Congratulations to all on another successful year for the Faculty of Health Sciences.

Yours in health,

Jan Polgar, PhD
Associate Dean (Scholarship)
