Course Description

This course will explore the stylistic functions of basic film elements, e.g., camera movement, editing, sound, and colour, through the analysis and production of films. 0.5 course

Students will work through a series of collaborative studio projects aimed at developing knowledge and technical proficiency regarding: pre-production planning and scriptwriting, composition and visual communication, manual camera control, colour grading, lighting, audio recording and sound design, as well as editing and stylization in post-production.

Studio production and experimentation will be complemented by online technical demonstrations, lectures, readings, discussions, and viewings aimed at developing critical response skills, conceptual foundations, and language appropriate for image evaluation and analysis. These will provide students with versatile tools and approaches through which ideas about filmmaking may be explored, and developed, culminating in a video production project.

No prior experience with digital technology and/or video production is required.

Objectives:

Upon completing the course, you will be able to:

- Effectively use a DV camera in manual shooting mode to focus, white balance, adjust exposure and audio levels;
- Apply conventions of shot framing, movement, sequencing and continuity;
- Effectively use the Premiere Pro CS6 or Davinci Resolve Non-linear editing software;
- Demonstrate an understanding of basic approaches to studio and outdoor reflective lighting;
- Effectively select and use appropriate technology for audio capture and sound design;
- Effectively use primary and secondary colour grading tools for colour design;
- Critically evaluate how meaning is generated through the organization and manipulation of sound and image, over time;

- Actively and constructively engage in critiques of peer's work and integrate feedback to further develop their own work;
- Use the terminology of video production to articulate ideas and intents in a clear, effective, and professional manner.

Course Materials

- **Required Text:** available at the Book store -*How to Shoot Video that Doesn't Suck* by Steve Stockman ISBN: 978-0-7611-6323-7
- SDHC or SDXC card class 10. A Micro SD card in an adapter will also work. You can purchase these when needed from the Arts and Humanities Technical Services Sign Out or any electronics store. A 32GB card will be adequate.
- A laptop computer and external hard drive (recommended minimum: 500GB) Headphones with 1/8" plug (preferably not ear buds) would be an asset.
- Instructional videos and other supplementary material will be posted on OWL.

Methods of Evaluation

The grade for the course will be arrived at as follows:

Assignments:

Assignments are designed to incorporate ideas and approaches learned both in class and through independent practice and experimentation. Students are encouraged to challenge themselves to explore, personalize, and expand on the creative potential of these skill sets.

Note that there is no final written exam.

Student performance will be evaluated in terms of technical proficiency, conceptual focus, synthesis, and work ethic. Successful projects will clearly demonstrate knowledge in four key areas:

- **preproduction** - research/planning
- **production** - capture of video/audio, and experimentation
- **post production** effective editing including synchronizing audio and video, and color grading
- **distribution** exporting video using an appropriate codec for YouTube and use on social media

A penalty of **5%** may be deducted from assignments submitted late, or those not presented in the required format. It is the student's responsibility to remain informed as to submission details and requirements. Assignments without official documentation will not be accepted after grades have been released. ***By communicating with the instructor before missing a due date you may avoid this penalty.***

Value of Assignments:

Mini Assignments Portfolio	30% (best 5/6)
Culminating Project 1	20%
Culminating Project 2	30%
Quizzes/Personal Learning	15%
Participation	5%
