

MEMORANDUM

December 23, 2014

Facilities Management Colleagues,

I am pleased to announce that Steve MacKay has accepted the permanent role of Manager, Mechanical and Electrical (Elevator/Motor/Vehicle), effective immediately. Steve also continues in his dual role in Facilities Development and Engineering as Mechanical Infrastructure Specialist.

Steve joined Western University in 1986 and has provided Western with many years of sage advice within Facilities Development & Engineering. Steve has for years been an integral part of Western's deferred maintenance efforts (along with his FDE colleagues) through the planning of projects funded through Maintenance and Modernization of Infrastructure funding, a role we are very pleased he will continue with.

During the past year Steve had taken on acting leadership responsibility for the Elevator, Motor and Vehicle shops.

I know you will join with me in supporting Steve and wishing him continued success in his dual role.

Regards,

Lynn Logan, CPA, CA, MBA
Associate Vice-President (Finance & Facilities)
