

**THE UNIVERSITY OF WESTERN ONTARIO
 BIOLOGICAL AGENTS REGISTRY FORM
 Approved Biohazards Subcommittee: October 14, 2010
 Biosafety Website: www.uwo.ca/humanresources/biosafety/**

This form must be completed by each Principal Investigator holding a grant administered by the University of Western Ontario (UWO) or in charge of a laboratory/facility where the use of Level 1, 2 or 3 biological agents is described in the laboratory or animal work proposed. The form must also be completed if any work is proposed involving animals carrying zoonotic agents infectious to humans or involving plants, fungi, or insects that require Public Health Agency of Canada (PHAC) or Canadian Food Inspection Agency (CFIA) permits.

This form must be updated at least every 3 years or when there are changes to the biological agents being used.

Containment Levels will be established in accordance with Laboratory Biosafety Guidelines, 3rd edition, 2004, Public Health Agency of Canada (PHAC) or Containment Standards for Veterinary Facilities, 1st edition 1996, Canadian Food Inspection Agency (CFIA).

Completed forms are to be returned to Occupational Health and Safety, (OHS), (Support Services Building, Room 4190) for distribution to the Biohazards Subcommittee. For questions regarding this form, please contact the Biosafety Officer at extension 81135 or biosafety@uwo.ca. If there are changes to the information on this form (excluding grant title and funding agencies), contact Occupational Health and Safety for a modification form. See website: www.uwo.ca/humanresources/biosafety/

PRINCIPAL INVESTIGATOR	Fred Possmayer
DEPARTMENT	OBS/GYN and BIOCHEM
ADDRESS	DSB5009
PHONE NUMBER	519 6612111, E80972, E80971, EE83528 T Regnault, 84823 D Hardy
EMERGENCY PHONE NUMBER(S)	519 438-0773 (home)
EMAIL	fpossmay@uwo.ca

Location of experimental work to be carried out: Building(s) Dental Sciences Building
 Room(s) DSB2019A, DSB5004, DSB5006

*For work being performed at Institutions affiliated with the University of Western Ontario, the Safety Officer for the Institution where experiments will take place must sign the form prior to its being sent to the University of Western Ontario Biosafety Officer (See Section 15.0, Approvals).

FUNDING AGENCY/AGENCIES: CIHR
 GRANT TITLE(S): Lipid-lipid and lipid-protein interactions in pulmonary surfactant

List all personnel working under Principal Investigators supervision in this location:

<u>Name</u>	<u>UWO E-mail Address</u>	<u>Date of Biosafety Training</u>
<u>Lin Zhao</u>	<u>Lzhoa3@uwo.ca</u>	

Please explain the biological agents and/or biohazardous substances used and how they will be stored, used and disposed of. Projects without this description will not be reviewed.

Culture experiments will be conducted in Laboratory DSB2019 which is shared with Drs, Dean Betts, Tim Regnault and Dan Hardy. Experiments are conducted in accordance with UWO's Laboratory Health and Safety Manual. In general, experiments are conducted by my research associate, Dr. Lin Zhao, whom I share with Drs. T. Regnault and D. Hardy.

Our cell lines are stored in a liquid nitrogen depository in the laboratory of Dr. Moshmi Bhattacharya. Culture manipulations are conducted, where possible, in an approved biosafety cabinet in laboratory DSB 5019. This facility is approved and has been inspected recently.

After studies, the cultures, samples and any other potentially contaminated materials are inactivated with 70% isopropanol or 70% ethanol, where appropriate. These reagents are kept in 250 or 500 ml plastic squeeze bottle and a few ml are forced into the culture dishes or whatever. The bottles are labeled "flammable". The dishes are flasks bagged in Biohazard disposable containers and autoclaved prior to disposal.

In general, standard commercial vectors and reagents are employed for genetic manipulation of RNA and DNA. One change over our previous protocols is that we propose to introduce the use of shRNAi to downregulate expression of the three known Lipid Phosphate Phosphohydrolase isoforms (Nanjundan M and Possmayer F., 2003, Pulmonary phosphatidic acid phosphatase and lipid phosphate phosphohydrolase. *Am J Physiol Lung Cell Mol Physiol* 284: L1-23). These are available commercially as lentiviral vector constructs. At present there is no reason to suspect these materials will constitute a biohazard.

The shRNAi reagents will be purchased from OpenBiosystems and stored as glycerol stocks in a freezer.

Cholera toxin and pertussis toxin are stored lyophilized and small aqueous stocks are stored frozen.

Please include a one page research summary or teaching protocol.

Our laboratory's studies have been primarily related to various aspects of pulmonary surfactant, a material which is essential for normal breathing. As part of these studies, we have been studying alveolar epithelial Type II cell lines. Type II cells, which cover <5% of the alveolar surface, synthesize and secrete pulmonary surfactant. During these studies, we examined lung epithelial T₇ cells, a purported Type II cell line derived from mice bearing a temperature-sensitive (TS) Large T antigen (de Mello et al. (2000)) *In Vitro Cell. Dev. Biol.* 36: 374-382). T₇ cells grow well at 37°C but stop dividing and differentiate at 41°C. During our studies, we discovered that this T₇ line had changed its phenotype from Type II to Type I. Type I cells are extremely difficult to isolate from the lung and in fact, this has only been reported a few times and by a single group. Although the number of Type I cell and Type II cells is similar, Type I cells cover >95% of the alveolar surface. These cells function in gas exchange and transport, but their functions are not well understood.

This discovery led us to examine the circumstances involved in establishing and manipulating Type I cell characteristics. In particular, we have found that cAMP affects the levels of lipid phosphate phosphohydrolase (LPP) activity and LPP isoform expression. We are currently attempting to determine the relative contributions of these isoforms to Type I cell LPP activity and the manner in which expression of these LPP isoforms and their activity is controlled. For these studies, we propose to transiently infect cells with lentiviral pGFZ and pLKO.I vectors to produce shRNAi to modify LPP isoform levels.

For these studies, T7 cells will be grown to confluence and treated with the LPP shRNAi constructs for 24-72 h. RNA will be extracted and Real Time PCR will be used to determine whether mRNA for the LPP1-3 are reduced. On the basis of these results conditions will be determined to lower LPP1-3 protein, as determined by western blotting.

We hope that LPP1, 2 and 3 protein expression can be individually reduced. LPP enzyme activity will then be measured under previously determined conditions. Should it be possible to selectively reduce the individual LPPs by say 50%, comparison between control and shRNAi conditions would allow us to assign approximate activities for each LPP isoform.

These studies will provide further information on the factors regulating the alveolar Type 1 cell phenotype and the manner in which LPP isoform expression is controlled. It will also establish a new and convenient platform for studying Type 1 cell function.

1.0 Microorganisms

1.1 Does your work involve the use of biological agents? YES NO
 (non-pathogenic and pathogenic biological agents including but not limited to bacteria and other microorganisms, viruses, prions, parasites or pathogens of plant or animal origin)? If no, please proceed to Section 2.0

Do you use microorganisms that require a permit from the CFIA? YES NO

If YES, please give the name of the species. _____

What is the origin of the microorganism(s)? _____

Please describe the risk (if any) of escape and how this will be mitigated:

Please attach the CFIA permit.

Please describe any CFIA permit conditions:

1.2 Please complete the table below:

Name of Biological Agent(s)* (Be specific)	Is it known to be a human pathogen? YES/NO	Is it known to be an animal pathogen? YES/NO	Is it known to be a zoonotic agent? YES/NO	Maximum quantity to be cultured at one time? (in Litres)	Source/ Supplier	PHAC or CFIA Containment Level
E. coli (dH5alpha)	<input type="radio"/> Yes <input checked="" type="radio"/> No	<input type="radio"/> Yes <input checked="" type="radio"/> No	<input type="radio"/> Yes <input checked="" type="radio"/> No	1-2 liters	Commercial or In House	<input checked="" type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2+ <input type="radio"/> 3
	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No			<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2+ <input type="radio"/> 3
	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No			<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2+ <input type="radio"/> 3
	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No			<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2+ <input type="radio"/> 3

*Please attach a Material Safety Data Sheet or equivalent from the supplier.

2.0 Cell Culture

2.1 Does your work involve the use of cell cultures?

YES

NO

If no, please proceed to Section 3.0

2.2 Please indicate the type of primary cells (i.e. derived from fresh tissue) that will be grown in culture:

Cell Type	Is this cell type used in your work?	Source of Primary Cell Culture Tissue	AUS Protocol Number
Human	<input type="radio"/> Yes <input checked="" type="radio"/> No		
Rodent	<input type="radio"/> Yes <input checked="" type="radio"/> No		
Non-human primate	<input type="radio"/> Yes <input checked="" type="radio"/> No		
Other (specify)	<input type="radio"/> Yes <input checked="" type="radio"/> No		

2.3 Please indicate the type of established cells that will be grown in culture in:

Cell Type	Is this cell type used in your work?	Specific cell line(s)*	Containment Level of each cell line	Supplier / Source of cell line(s)
Human	<input checked="" type="radio"/> Yes <input type="radio"/> No	A549,H440 (lung epithelial) HEK293	1 or 2?	ATCC,In house,
Rodent	<input checked="" type="radio"/> Yes <input type="radio"/> No	MLE-12, T ₇ (mouse lung epithelial, SV40 large T antigen)	2	Jeff Whitsett who developed this cell line. It is now available from ATCC Martin Post, Paediatrics, H Sick Children
Non-human primate	<input type="radio"/> Yes <input checked="" type="radio"/> No			
Other (specify)	<input type="radio"/> Yes <input checked="" type="radio"/> No	HEK 293(E1A oncogene) CHO		

*Please attach a Material Safety Data Sheet or equivalent from the supplier. (For more information, see www.atcc.org)

2.4 For above named cell types(s) indicate PHAC or CFIA containment level required 1 2 2+ 3

3.0 Use of Human Source Materials

3.1 Does your work involve the use of human source materials? YES NO
If no, please proceed to Section 4.0

3.2 Indicate in the table below the Human Source Material to be used.

Human Source Material	Source/Supplier /Company Name	Is Human Source Material Infected With An Infectious Agent? YES/UNKNOWN	Name of Infectious Agent (If applicable)	PHAC or CFIA Containment Level (Select one)
Human Blood (whole) or other Body Fluid		<input type="radio"/> Yes <input type="radio"/> Unknown		<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2+ <input type="radio"/> 3
Human Blood (fraction) or other Body Fluid		<input type="radio"/> Yes <input type="radio"/> Unknown		<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2+ <input type="radio"/> 3
Human Organs or Tissues (unpreserved)		<input type="radio"/> Yes <input type="radio"/> Unknown		<input type="radio"/> 1 <input type="radio"/> 2 <input type="radio"/> 2+ <input type="radio"/> 3
Human Organs or Tissues (preserved)		Not Applicable		Not Applicable

4.0 Genetically Modified Organisms and Cell lines

4.1 Will genetic modifications be made to the microorganisms, biological agents, or cells described in Sections 1.0 and 2.0? YES NO If no, please proceed to Section 5.0

4.2 Will genetic modification(s) involving plasmids be done? YES, complete table below NO

Bacteria Used for Cloning *	Plasmid(s) **	Source of Plasmid	Gene Transfected	Describe the change that results from transformation or tranfection

Ecoli (DH5 alpha)	pCMV-SPORTS	Open Biosystems	LPP1-3	<i>.no changes noted when we have done similar experiments in the past</i> <i>We have not used these particular clones yet but do not anticipate any difference</i>
-------------------	-------------	-----------------	--------	--

* Please attach a Material Data Sheet or equivalent if available.

** Please attach a plasmid map.

See Appendix added at end for plasmid maps

Please attach a full description of the biological agent.

5.2 Will the biological agent be able to replicate in the host? YES NO

5.3 How will the biological agent be administered? _____

5.4 Please give the Health Care Facility where the clinical trial will be conducted: _____

5.5 Has human ethics approval been obtained? YES, number: _____ NO PENDING

6.0 Animal Experiments

6.1 Will live animals be used? YES NO If no, please proceed to section 7.0

6.2 Name of animal species to be used _____

6.3 AUS protocol # _____

6.4 Will any of the agents listed in section 4.0 be used in live animals YES, specify: _____ NO

6.5 Will the agent(s) be shed by the animal: YES NO, please justify:

7.0 Use of Animal species with Zoonotic Hazards

7.1 Will any animals with zoonotic hazards or their organs, tissues, lavages or other body fluids including blood be used (see list below)? YES No If no, please proceed to section 8.0

7.2 Will live animals be used? YES No

7.3 If yes, please specify the animal(s) used:

- ◆ Pound source dogs YES NO
- ◆ Pound source cats YES NO
- ◆ Cattle, sheep or goats YES, please specify species _____ NO
- ◆ Non-human primates YES, please specify species _____ NO
- ◆ Wild caught animals YES, please specify species & colony # ____ In some cases we may examine extracts from the 13-striped ground squirrel. These extracts are from a collaboration with Dr. Jim Staples BIOLOGY and Ruud Veldhuizen Lawson Research Institute, UWO.
- ◆ The extracts will be in chloroform:methanol and so will be sterile.
- ◆ _____ NO
- ◆ Birds YES, please specify species _____ NO
- ◆ Others (wild or domestic) YES, please specify ____ We may also obtain lungs from investigators using Xenopus laevis (e.g. Tom Drysdale, VRL, UWO) to extract surfactant _____ NO

7.4 If no live animals are used, please specify the source of the specimens: See above _____

8.0 Biological Toxins

8.1 Will toxins of biological origin be used? YES NO If no, please proceed to Section 9.0

8.2 If YES, please name the toxin(s) __Cholera toxin, pertussis toxin _____

Please attach information, such as a Material Safety Data Sheet, for the toxin(s) used.
Could not find a Materials Sheet for either cholera or pertussis toxin

8.3 What is the LD₅₀ (specify species) of the toxin_____Cholera toxin 250 ug for mice. Presume Pertussis is in the same overall range._____

8.4 How much of the toxin is handled at one time*? ____Cholera__10 ug____,Pertussis 5 ug_____

8.5 How much of the toxin is stored*? ____Cholera_____500 ug____Perussis 50 ug_____

8.6 Will any biological toxins be used in live animals? YES, Please provide details:_____ NO

*For information on biosecurity requirements, please see:

http://www.uwo.ca/humanresources/docandform/docs/healthandsafety/biosafety/Biosecurity_Requirements.pdf

Web site does not seem to function

9.0 Insects

9.1 Do you use insects? YES NO If no, please proceed to Section 10.0

9.2 If YES, please give the name of the species. _____

9.3 What is the origin of the insect? _____

9.4 What is the life stage of the insect? _____

9.5 What is your intention? Initiate and maintain colony, give location: _____
 "One-time" use, give location: _____

9.6 Please describe the risk (if any) of escape and how this will be mitigated:

9.7 Do you use insects that require a permit from the CFIA permit? YES NO

If YES, Please attach the CFIA permit & describe any CFIA permit conditions:

10.0 Plants

10.1 Do you use plants? YES NO If no, please proceed to Section 11.0

10.2 If YES, please give the name of the species. _____

10.3 What is the origin of the plant? _____

10.4 What is the form of the plant (seed, seedling, plant, tree...)? _____

10.5 What is your intention? Grow and maintain a crop "One-time" use

10.6 Do you do any modifications to the plant? YES NO
If yes, please describe: _____

10.7 Please describe the risk (if any) of loss of the material from the lab and how this will be mitigated:

10.8 Is the CFIA permit attached? YES NO
If YES, Please attach the CFIA permit & describe any CFIA permit conditions:

11.0 Import Requirements

11.1 Will any of the above agents be imported? YES, please give country of origin ___USA___ NO

shRNA constructs are purchased from Thermo Open BioSystems.
If no, please proceed to Section 12.0

11.2 Has an Import Permit been obtained from HC for human pathogens? YES NO
No known human pathogens

11.3 Has an import permit been obtained from CFIA for animal or plant pathogens? YES NO
No known animal or plant pathogens

11.4 Has the import permit been sent to OHS? YES, please provide permit # _____ NO

12.0 Training Requirements for Personnel Named on Form

All personnel named on the above form who will be using any of the above named agents are required to attend the following training courses given by OHS:

- ◆ Biosafety
- ◆ Laboratory and Environmental/Waste Management Safety
- ◆ WHMIS (Western or equivalent)
- ◆ Employee Health and Safety Orientation

As the Principal Investigator, I have ensured that all of the personnel named on the form who will be using any of the biological agents in Sections 1.0 to 9.0 have been trained.

SIGNATURE _____

13.0 Containment Levels

13.1 For the work described in sections 1.0 to 9.0, please indicate the highest HC or CFIA Containment Level required. 1 2 2+ 3

13.2 Has the facility been certified by OHS for this level of containment?
 YES, date of most recent biosafety inspection: Nov 2010
 NO, please certify
 NOT REQUIRED for Level 1 containment

13.3 Please indicate permit number (not applicable for first time applicants): BIO-LHRI-0020

14.0 Procedures to be Followed

14.1 Please describe additional risk reduction measures will be taken beyond containment level 1, 2, 2+ or 3 measures, that are unique to this agent.

14.2 Please outline what will be done if there is an exposure to the biological agents listed, such as a needlestick injury or an accidental splash:

Will reread the UWO instructions as listed below and comply as indicated. ___

3.5 MEDICAL PROCEDURES AND INCIDENT REPORTING

The following emergency response procedures shall be followed when a worker has been potentially exposed to a biohazardous agents via a needlestick, cut, animal bite or scratch, via mucous membrane contact, or via non-intact skin contact.

Worker

1. The exposed site must be washed immediately.
 - a) In case of a needlestick, cut, animal bite or scratch, wash with soap and water after allowing the wound to bleed freely.
 - b) If mucous (eyes, nose, mouth) membrane or non-intact (cuts, rash, eczema or dermatitis) skin contact, flush with water at the nearest faucet or eye wash station for a minimum of ten minutes.
2. The worker must immediately inform the Supervisor/Principal Investigator of the exposure incident.
3. The worker must seek prompt medical attention at Workplace Health (during the hours of operation), the nearest hospital emergency department or emergency clinic, or a Medical Practitioner of their choosing. Any information including the Material Safety Data Sheet or equivalent for the biohazardous agent must also be taken to the care provider.
4. The worker must provide information for a Accident/Incident Report (obtained from her/his Supervisor/Principal Investigator), describing the incident in detail, including the route of exposure and the emergency actions taken, and a description of the worker's duties as they relate to the exposure incident.

14.3 As the Principal Investigator, I will ensure that this project will follow the Western Biosafety Guidelines and Procedures Manual for Containment Level 1 & 2 Laboratories (and the Level 3 Facilities Manual for Level 3 projects). I will ensure that UWO faculty, staff and students working in my laboratory have an up-to-date Hazard Communication Form, found at <http://www.wph.uwo.ca/>

Appendix

2.2

Biosafety level 2

This level is similar to Biosafety Level 1 and is suitable for work involving agents of moderate potential hazard to personnel and the environment.^[7] It includes various bacteria and viruses that cause only mild disease to humans, or are difficult to contract via [aerosol](#) in a lab setting, such as [C. difficile](#), most [Chlamydiae](#), hepatitis [A](#), [B](#), and [C](#), [influenza A](#), [Lyme disease](#), [dengue fever](#), [Salmonella](#), [mumps](#), [measles](#), [HIV](#),^[8] [scrapie](#), [MRSA](#), and [VRSA](#). Genetically modified organisms have also been classified as level 2 organisms^[citation needed], even if they pose no direct threat to humans. This designation is used to limit the release of modified organisms into the environment. Approval by the FDA is required to release these organisms. An example is genetically modified food crops. BSL-2 differs from BSL-1 in that:

1. laboratory personnel have specific training in handling pathogenic agents and are directed by scientists with advanced training;
2. access to the laboratory is limited when work is being conducted;
3. extreme precautions are taken with contaminated sharp items; and
4. certain procedures in which infectious aerosols or splashes may be created are conducted in [biological safety cabinets](#) or other physical containment equipment.

Material Safety Data Sheet

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name Clones

Cat No. Clones

Synonyms No information available.

Recommended Use Laboratory chemicals

2. HAZARDS IDENTIFICATION

Target Organs Liver, Kidney

Potential Health Effects

Acute Effects

Principle Routes of Exposure

Eyes May cause irritation.

Skin May cause irritation. May be harmful in contact with skin.

Inhalation May cause irritation of respiratory tract. May be harmful if inhaled.

Ingestion May be harmful if swallowed. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

Emergency Overview

Revision Number 1

May cause eye, skin, and respiratory tract irritation . Handle in accordance with good industrial hygiene and safety practice. The toxicological properties have not been fully investigated.

Creation Date 23-Apr-2009 **Revision Date** 23-Apr-2009

Appearance Yellow Brown **Physical State** Liquid. **Odor** No information available

Chronic Effects Tumorigenic effects have been reported in experimental animals.. Experiments have shown reproductive toxicity effects on laboratory animals. May cause adverse liver effects. May cause adverse kidney effects.

See Section 11 for additional Toxicological information.

Aggravated Medical Conditions Preexisting eye disorders. Kidney disorders. Skin disorders.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Haz/Non-haz

Component CAS-No Weight %

Peptones 73049-73-7 1

Water 7732-18-5 80 - 96

Sodium chloride 7647-14-5 1

Agar 9002-18-0 1 - 2

Yeast, ext. 8013-01-2 0.5

Glycerol 56-81-5 8

4. FIRST AID MEASURES

Eye Contact Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Obtain medical attention.

Skin Contact Wash off immediately with plenty of water for at least 15 minutes. Get medical attention immediately if symptoms occur.

Inhalation Move to fresh air. If breathing is difficult, give oxygen. Get medical attention immediately if symptoms occur.

Ingestion Do not induce vomiting. Obtain medical attention.

Notes to Physician Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Flash Point Not applicable

Method No information available.

Autoignition Temperature No information available.

Explosion Limits

Upper No data available

Lower No data available

Suitable Extinguishing Media Substance is nonflammable; use agent most appropriate to extinguish surrounding fire..

Unsuitable Extinguishing Media No information available.

Hazardous Combustion Products No information available.

Sensitivity to mechanical impact No information available.

Sensitivity to static discharge No information available.

Page 2 / 8

Thermo Fisher Scientific - Clones Revision Date 23-Apr-2009

Specific Hazards Arising from the Chemical

Thermal decomposition can lead to release of irritating gases and vapors.

Protective Equipment and Precautions for Firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions Ensure adequate ventilation. Use personal protective equipment. Avoid contact with skin, eyes and clothing.

Environmental Precautions Should not be released into the environment.

Methods for Containment and Clean

Up

Soak up with inert absorbent material. Keep in suitable and closed containers for disposal.

7. HANDLING AND STORAGE

Handling Ensure adequate ventilation. Wear personal protective equipment. Avoid contact with skin, eyes and clothing. Do not breathe vapors or spray mist.

Storage Keep container tightly closed in a dry and well-ventilated place. Long term. Keep at -80°C.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Measures Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations and safety showers are close to the workstation location.

Exposure Guidelines

Component ACGIH TLV OSHA PEL NIOSH IDLH

Glycerol = 10 mg/m³ TWA = 10 mg/m³ TWA total dust

= 5 mg/m³ TWA respirable fraction

= 15 mg/m³ TWA total

Component Quebec Mexico OEL (TWA) Ontario TWAEV

Glycerol = 10 mg/m³ TWAEV mist = 10 mg/m³ TWA mist = 10 mg/m³ TWAEV

NIOSH IDLH: *Immediately Dangerous to Life or Health*

Personal Protective Equipment

Eye/face Protection Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166

Skin and body protection Wear appropriate protective gloves and clothing to prevent skin exposure

Respiratory Protection Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.

Thermo Scientific Open Biosystems Freedom ORF Clones and Collection (glycerol)

Catalog #: OHS1164, OHS1166, OHS1169

Introduction

Thermo Scientific Open Biosystems Freedom ORF clones are collections of high quality sequence verified genes cloned into vectors that are free from the IP constraints commonly found with other recombinational cloning systems. Each clone has been amplified and sequenced to ensure the highest quality standard. Open Biosystems offers a set of over 1,600 human Clontech BD Creator Universal Clones, which represents the initial release of the Freedom™ ORF collection.

The Clontech BD Creator™ system is a flexible recombinational cloning system based on Cre-loxP reactions.

These ORF clones are provided to you in the pDNR-Dual vector, allowing you to move the inserts directly into any expression vector of choice through a simple Cre recombinase reaction. The resulting expression clone contains the ORF in both proper orientation and reading frame. The BD Creator™ Universal Clones are constructed for immediate 3' tagging with a 6xTN affinity tag. A large portion of the genes in this set are represented by two clones; one with a stop codon and one without, giving you the freedom to produce native or fusion proteins to tag the ORF.

Clone Storage

80°C indefinitely.

Product Description

96-well microtiter plates containing bacterial cultures of *E. coli* in LB broth with an inert growth indicator + 8% glycerol + ampicillin at a concentration of 100 µg/mL.

Making A Stock Culture

Once the clone has been streak isolated and the identity of the strain has been confirmed, we recommend making a stock of the pure culture. Grow the pure culture in LB broth + ampicillin at a concentration of 100 µg/mL.

Transfer 920 µL of culture into a polypropylene tube and add 80 µL sterile glycerol to make an 8% glycerol freezing solution. Vortex the culture to evenly mix the glycerol throughout the culture. The culture can be stored indefinitely at -80°C.

2

8.2A

Cholera Toxin from *Vibrio cholerae* ~95% (SDS-PAGE), lyophilized powder, 1×10^5 - 1×10^6 units/mg protein Toxin consisting of an A subunit (27 kDa) surrounded by five B subunits (approximately 12 kDa each), which attach the toxin to ganglioside GM₁ on the cell surface. The A subunit catalyzes ADP-ribosylation of the α -subunit of the stimulatory G protein (G_{α_s}), reducing GTPase activity and activating the α -subunit. This activation of G_{α_s} leads to an increase in the activity of adenylyl cyclase, resulting in increased levels of cAMP. Also ADP-ribosylates transducin in the eye rod outer segments, inactivating its GTPase activity. Cholera toxin has also been reported to ADP-ribosylate tubulin. Shown to be a potent mucosal vaccine adjuvant, inducing T helper cell type 2 responses by inhibiting the production of interleukin-12.

8.2B

Pertussis toxin from *Bordetella pertussis* buffered aqueous glycerol solution Pertussis toxin catalyzes the ADP-ribosylation of the α subunits of the heterotrimeric guanine nucleotide regulatory proteins G_i , G_o , and G_i . This prevents the G protein heterotrimers from interacting with receptors, thus blocking their coupling and activation. Since the G_{α} subunits remain in their GDP-bound, inactive state, they are unable to inactivate adenylyl cyclase or open K^+ channels.

 MSDS Request

MSDS Temporarily Unavailable for Cholera Toxin

We were unable to locate the MSDS you were searching for. The MSDS may be temporarily unavailable or you may have encountered an error in the product number. Please see the most common problems below for help in locating the MSDS.

Pop-up Blockers

Some pop-up blockers can affect your browser's ability to launch MSDS's from the Sigma-Aldrich web site. If you receive a message regarding pop-up's upon attempting to access an MSDS you will need to set the pop-up blocker to "Always Allow" pop-ups from our site. Setting your pop-up blocker to "Temporarily Allow" pop-ups from our site will result in the MSDS not being located.

Incorrect Product Number Format

With recent improvements to our systems you may have encountered elongated Product Numbers that include the package size in various documentation. Please omit the package size from your query, i.e., Correct Query: A4503; Incorrect Query: A4503-100G.

Incorrect Brand Selection

When searching by Product Number you must select a brand. If an incorrect brand is selected there will not be a match.

4. FIRST AID MEASURES

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

5. FIRE-FIGHTING MEASURES

Conditions of flammability

Not flammable or combustible.

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Special protective equipment for fire-fighters

Wear self contained breathing apparatus for fire fighting if necessary.

Hazardous combustion products

Hazardous decomposition products formed under fire conditions. - Nature of decomposition products not known.

Explosion data - sensitivity to mechanical impact

no data available

END PAGE @

Explosion data - sensitivity to static discharge

no data available

6. ACCIDENTAL RELEASE MEASURES

Personal precautions

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

Environmental precautions

Do not let product enter drains.

Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

7. HANDLING AND STORAGE

Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols.

Provide appropriate exhaust ventilation at places where dust is formed. Normal measures for preventive fire protection.

Conditions for safe storage

Keep container tightly closed in a dry and well-ventilated place.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Contains no substances with occupational exposure limit values.

Personal protective equipment

Respiratory protection

For nuisance exposures use type P95 (US) or type P1 (EU EN 143) particle respirator. For higher level protection use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Hand protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Eye protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin and body protection

impervious clothing, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Hygiene measures

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Specific engineering controls

Use mechanical exhaust or laboratory fumehood to avoid exposure.

End Page 2

7. HANDLING AND STORAGE

Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols.

Provide appropriate exhaust ventilation at places where dust is formed. Normal measures for preventive fire protection.

Conditions for safe storage

Keep container tightly closed in a dry and well-ventilated place.

Recommended storage temperature: 2 - 8 °C

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Contains no substances with occupational exposure limit values.

Personal protective equipment

Respiratory protection

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Hand protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Eye protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin and body protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Hygiene measures

Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product.

Specific engineering controls

Use mechanical exhaust or laboratory fumehood to avoid exposure.

Mobility in soil

no data available

PBT and vPvB assessment

no data available

Other adverse effects

no data available

13. DISPOSAL CONSIDERATIONS**Product**

Offer surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

Contaminated packaging

Dispose of as unused product.

14. TRANSPORT INFORMATION

DOT (US)

UN-Number: 3462 Class: 6.1 Packing group: I

Proper shipping name: Toxins, extracted from living sources, solid, n.o.s. (Pertussis toxin from Bordetella Pertussis)

The Office of Biohazard Containment and Safety (BCS) of the Canadian Food Inspection Agency (CFIA) only issues import permits for microorganisms that are pathogenic to animals, or parts of microorganisms that are pathogenic to animals. As the products listed above are not considered pathogenic to animals, the Office of BCS does not have any regulatory requirements for their importation.

Please note that other legislation may apply. You may wish to contact the Public Health Agency of Canada's (PHAC) Office of Laboratory Security at (613) 957-1779.

Note: Microorganisms pathogenic to animals and veterinary biologics require an import permit from the CFIA.

Sincerely,

Cinthia Labrie
 Head, Animal Pathogen Importation Program
 Office of Biohazard Containment & Safety

D13S317: 11
D16S539: 11,12

DNA Profile (STR): D5S818: 11
D7S820: 8,11
TH01: 8,9,3
TPOX: 8,11
vWA: 14

Cytogenetic Analysis: This is a hypotriploid human cell line with the modal chromosome number of 66, occurring in 24% of cells. Cells with 64 (22%), 65, and 67 chromosome counts also occurred at relatively high frequencies; the rate with higher ploidies was low at 0.4%. There were 6 markers present in single copies in all cells. They include der(6)t(1;6) (q11;q27); ?del(6) (p23); del(11) (q21), del(2) (q11), M4 and M5. Most cells had two X and two Y chromosomes. However, one or both Y chromosomes were lost in 40% of 50 cells analyzed. Chromosomes N2 and N6 had single copies per cell; and N12 and N17 usually had 4 copies.

Isoenzymes: G6PD, B

Age: 58 years

Permits/Forms:

Isolation: **Isolation date:** 1992

Tumorigenic: Yes

Age: 5 month old

Gender: female

This line was established in 1992 by Kathryn A. Wikenheiser from pulmonary tumors in a mouse transgenic for the SV40 large T antigen under the control of the promoter region of the human surfactant protein C gene.

Comments:

The cells express the mRNA for large T antigen.

Lung surfactant proteins B and C were detected.

The cells secrete phospholipids in response to phorbol esters and ATP but not in response to forskolin.

Toxin Info

TOXIN USE RISK ASSESSMENT

Name of Toxin:	Cholera toxin
Proposed Use Dose:	10 µg
Proposed Storage Dose:	500 µg
LD ₅₀ (species):	250 µg

Calculation:

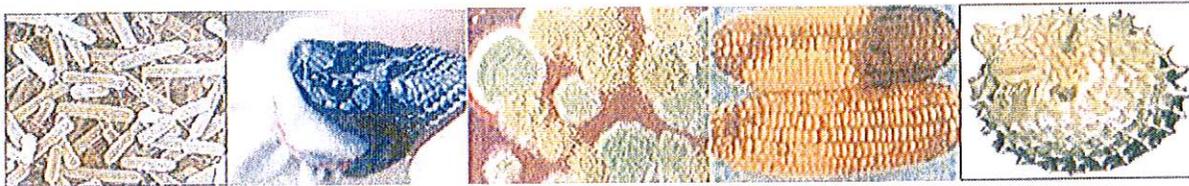

$$250 \text{ µg/kg} \quad \times \quad 50 \text{ kg/person}$$

$$\text{Dose per person based on LD}_{50} \text{ in µg} = 12500$$

$$\text{LD}_{50} \text{ per person with safety factor of 10 based on LD}_{50} \text{ in µg} = 1250$$

Comments/Recommendations:

Toxins of Biological Origin

Biological toxins are produced by certain bacteria, fungi, protozoa, plants, reptiles, amphibians, fish, echinoderma (spiny urchins and starfish), mollusks, and insects.

The EH&S Biosafety Office regulates the **possession, use, and transfer of unfractionated mixtures and purified preparations of biological toxins with a mammalian LD₅₀ of ≤ 100 ug/kg body weight, as well as the organisms, both natural and recombinant, which produce these biological toxins.** These are called "Acute Toxins". Registration forms can be found at <http://www.ehs.ufl.edu/Bio/default.asp>

The following table from the UF EH&S Biological Safety Manual lists LD₅₀ values for some biological toxins. Toxins not on this list may still require registration. For more information, please contact the Biosafety Office at 392-1591.

Toxin	LD50 (ug/kg)*
Abrin	0.7
Aerolysin	7.0
Botulinin toxin A	0.0012
Botulinin toxin B	0.0012
Botulinin toxin C1	0.0011
Botulinin toxin C2	0.0012
Botulinin toxin D	0.0004
Botulinin toxin E	0.0011
Botulinin toxin F	0.0025
b-bungarotoxin	14.0
Caeruleotoxin	53
Cereolysin	40-80
Cholera toxin	250
Clostridium difficile enterotoxin A	0.5
Clostridium difficile cytotoxin B	220
Clostridium perfringens lecithinase	3
Clostridium perfringens kappa toxin	1500
Clostridium perfringens perfringolysin O	13-16
Clostridium perfringens enterotoxin	81
Clostridium perfringens beta toxin	0.4
Clostridium perfringens delta toxin	5
Clostridium perfringens epsilon toxin	0.1
Conotoxin	12-30
Crotoxin	82
Diphtheria toxin	0.1
Listeriolysin	3-12
Leucocidin	50

4/4/2011

Acute Biological Toxins

Modeccin	1-10
Nematocyst toxins	33-70
Notexin	25
Pertussis toxin	15
Pneumolysin	1.5
Pseudomonas aeruginosa toxin A	3
Ricin	2.7
Saxitoxin	8
Shiga toxin	20
Shigella dysenteriae neurotoxin	1.3
Streptolysin O	8
Staphylococcus enterotoxin B	25
Staphylococcus enterotoxin F	2-10
Streptolysin S	25
Taipoxin	2
Tetanus toxin	0.001
Tetrodotoxin	8
Viscumin	2.4-80
Volkensin	1.4
Yersinia pestis murine toxin	10

*Please note that the LD50 values are from a number of sources (see below). For specifics on route of application (i.v., i.p., s.c.), animal used, and variations on the listed toxins, please go to the references listed below.

2. Stirpe, F.; Luigi Barbieri; Maria Giulia Battelli, Marco Soria and Douglas A. Lappi; 1992; Ribosome-inactivating proteins from plants: present status and future prospects; Biotechnology; 10: 405-412
3. Registry of toxic effects of chemical substances (RTECS): comprehensive guide to the RTECS. 1997. Doris V. Sweet, ed., U.S. Dept of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, National Institute for Occupational Safety and Health; Cincinnati, Ohio

More Examples of Biological Toxins Which May Require Registration

Aflatoxins	Leurotoxins
Amanitin	Lipid A - all types
Amphibian venoms	Lipopolysaccharides from all species
Anatoxin A	Maitotoxin
Anthrax toxin	Medamine
Aspergillus sp toxins	Microcystins
Bacillus sp. toxins - all	Mojave toxin
Bordetella sp. toxins	Mycotoxins - all
Botulinum toxins - all	Myotoxins
Brevetoxins	Neurotoxins - all
Bungarotoxins	Notexin
Cardiotoxin	Nodularin
Charybdotoxin	Ochratoxin

TOXIN USE RISK ASSESSMENT

Name of Toxin:	Pertussis
Proposed Use Dose:	5 µg
Proposed Storage Dose:	50 µg
LD ₅₀ (species):	15 µg

<u>Calculation:</u>	
15 µg/kg	x 50 kg/person
Dose per person based on LD ₅₀ in µg = 750	
LD ₅₀ per person with safety factor of 10 based on LD ₅₀ in µg = 75

Exotoxin, vibrio cholerae			
9012-63-9	-	-	>= 0.5 - <= 2.5 %
Edetate disodium dihydrate			
6381-92-6	205-358-3	-	>= 0.96 - <= 0.98 %

4. FIRST AID MEASURES

General advice

Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.

If inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

In case of eye contact

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

5. FIRE-FIGHTING MEASURES

Conditions of flammability

Not flammable or combustible.

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Special protective equipment for fire-fighters

Wear self contained breathing apparatus for fire fighting if necessary.

Hazardous combustion products

Hazardous decomposition products formed under fire conditions. - Nature of decomposition products not known.

Explosion data - sensitivity to mechanical impact

no data available

Explosion data - sensitivity to static discharge
no data available

6. ACCIDENTAL RELEASE MEASURES

Personal precautions

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

Environmental precautions

Do not let product enter drains.

Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

7. HANDLING AND STORAGE

Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust is formed. Normal measures for preventive fire protection.

Conditions for safe storage

Keep container tightly closed in a dry and well-ventilated place.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Contains no substances with occupational exposure limit values.

Personal protective equipment

Respiratory protection

For nuisance exposures use type P95 (US) or type P1 (EU EN 143) particle respirator. For higher level protection use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Hand protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

Eye protection

Safety glasses with side-shields conforming to EN166 Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Skin and body protection

Impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Hygiene measures

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

Specific engineering controls

Use mechanical exhaust or laboratory fumehood to avoid exposure.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Form	solid
Colour	no data available

Safety data

pH	no data available
Melting/freezing	no data available

point	
Boiling point	no data available
Flash point	no data available
Ignition temperature	no data available
Autoignition temperature	no data available
Lower explosion limit	no data available
Upper explosion limit	no data available
Vapour pressure	no data available
Density	no data available
Water solubility	no data available
Partition coefficient: n-octanol/water	no data available
Relative vapour density	no data available
Odour	no data available
Odour Threshold	no data available
Evaporation rate	no data available

10. STABILITY AND REACTIVITY

Chemical stability

Stable under recommended storage conditions.

Possibility of hazardous reactions

no data available

Conditions to avoid

no data available

Materials to avoid

Dimethyl sulfate, Acid chlorides, Halogenated hydrocarbon, Metals, Acids

Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. - Nature of decomposition products not known.

See reverse side of invoice or packing slip for additional terms and conditions of sale.

SIGMA-ALDRICH

MATERIAL SAFETY DATA SHEET

Date Printed: 04/01/2011
Date Updated: 10/03/2008
Version 1.6

Section 1 - Product and Company Information

Product Name PERTUSSIS TOXIN
Product Number P0317
Brand SIGMA

Company Sigma-Aldrich Canada, Ltd
Address 2149 Winston Park Drive
Oakville ON L6H 6J8 CA

Technical Phone: 9058299500
Fax: 9058299292
Emergency Phone: 800-424-9300

Section 2 - Composition/Information on Ingredient

Substance Name	CAS #	SARA 313
PERTUSSIS TOXIN	70323-44-3	No

Synonyms Histamine-sensitizing factor * IAP * Islet
activating protein * Lymphocytosis-promoting
factor * Pertussigen

RTECS Number: XW5883750

Section 3 - Hazards Identification

EMERGENCY OVERVIEW

Biohazard. Toxic.
Toxic by inhalation, in contact with skin and if swallowed.
Biomedical material. May cause human disease. Target organ(s):
Pancreas.

HMIS RATING

HEALTH: 3*
FLAMMABILITY: 0
REACTIVITY: 0

NFPA RATING

HEALTH: 3
FLAMMABILITY: 0
REACTIVITY: 0

*additional chronic hazards present.

For additional information on toxicity, please refer to Section 11.

Section 4 - First Aid Measures

ORAL EXPOSURE

If swallowed, wash out mouth with water provided person is
conscious. Call a physician immediately.

INHALATION EXPOSURE

If inhaled, remove to fresh air. If not breathing give

artificial respiration. If breathing is difficult, give oxygen.

DERMAL EXPOSURE

In case of skin contact, flush with copious amounts of water for at least 15 minutes. Remove contaminated clothing and shoes. Call a physician.

EYE EXPOSURE

In case of contact with eyes, flush with copious amounts of water for at least 15 minutes. Assure adequate flushing by separating the eyelids with fingers. Call a physician.

Section 5 - Fire Fighting Measures

FLASH POINT

N/A

AUTOIGNITION TEMP

N/A

FLAMMABILITY

N/A

EXTINGUISHING MEDIA

Suitable: Water spray. Carbon dioxide, dry chemical powder, or appropriate foam.

FIREFIGHTING

Protective Equipment: Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.
Specific Hazard(s): Emits toxic fumes under fire conditions.

Section 6 - Accidental Release Measures

PROCEDURE TO BE FOLLOWED IN CASE OF LEAK OR SPILL

Evacuate area.

PROCEDURE(S) OF PERSONAL PRECAUTION(S)

Wear self-contained breathing apparatus, rubber boots, and heavy rubber gloves.

METHODS FOR CLEANING UP

Inactivate spilled material with 5% sodium hypochlorite. Place in appropriate container. Ventilate area and wash spill site after material pickup is complete.

Section 7 - Handling and Storage

HANDLING

User Exposure: Do not breathe dust. Do not get in eyes, on skin, on clothing. Avoid prolonged or repeated exposure.

STORAGE

Suitable: Keep tightly closed.
Store at -20°C

Section 8 - Exposure Controls / PPE

ENGINEERING CONTROLS

Use only in a chemical fume hood. Safety shower and eye bath.

PERSONAL PROTECTIVE EQUIPMENT

Respiratory: Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU). Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N99 (US) or type P2 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator.
Hand: Compatible chemical-resistant gloves.
Eye: Chemical safety goggles.

GENERAL HYGIENE MEASURES

Wash contaminated clothing before reuse. Wash thoroughly after handling.

Section 9 - Physical/Chemical Properties

Appearance	Physical State: Solid	
Property	Value	At Temperature or Pressure
pH	N/A	
BP/BP Range	N/A	
MP/MP Range	N/A	
Freezing Point	N/A	
Vapor Pressure	N/A	
Vapor Density	N/A	
Saturated Vapor Conc.	N/A	
Bulk Density	N/A	
Odor Threshold	N/A	
Volatile%	N/A	
VOC Content	N/A	
Water Content	N/A	
Solvent Content	N/A	
Evaporation Rate	N/A	
Viscosity	N/A	
Surface Tension	N/A	
Partition Coefficient	N/A	
Decomposition Temp.	N/A	
Flash Point	N/A	
Explosion Limits	N/A	
Flammability	N/A	
Autoignition Temp	N/A	
Refractive Index	N/A	
Optical Rotation	N/A	
Miscellaneous Data	N/A	
Solubility	N/A	

N/A = not available

Section 10 - Stability and Reactivity

STABILITY

Stable: Stable.

Materials to Avoid: Strong oxidizing agents.

HAZARDOUS DECOMPOSITION PRODUCTS

Hazardous Decomposition Products: Carbon monoxide, Carbon dioxide.

HAZARDOUS POLYMERIZATION

Hazardous Polymerization: Will not occur

Section 11 - Toxicological Information

ROUTE OF EXPOSURE

Skin Contact: May cause skin irritation.
Skin Absorption: Toxic if absorbed through skin.
Eye Contact: May cause eye irritation.
Inhalation: Toxic if inhaled. Material may be irritating to mucous membranes and upper respiratory tract.
Ingestion: Toxic if swallowed.

TARGET ORGAN(S) OR SYSTEM(S)

Pancreas.

CONDITIONS AGGRAVATED BY EXPOSURE

Potentially neurotoxic.

ADDITIONAL INFORMATION

Pertussis toxin is one of the active factors responsible for whooping cough. This toxin causes potentiation of insulin-releasing responses, promotion of lipolysis on adipocytes, inhibition of epinephrine-induced hyperglycemia, ADP-ribosylation of cell-membrane protein, activation of adenylate cyclase, lymphocytosis-promoting activity, histamine-sensitizing activity, hemagglutination activity, and adjuvant activity.

TOXICITY DATA

Oral

Mouse

0.0018 mg/kg

LD50

Remarks: Pertussis toxin is one of the active factors responsible for whooping cough. This toxin causes potentiation of insulin-releasing responses, promotion of lipolysis on adipocytes, inhibition of epinephrine-induced hyperglycemia, ADP-ribosylation of cell-membrane protein, activation of adenylate cyclase, lymphocytosis-promoting activity, histamine-sensitizing activity, hemagglutination activity, and adjuvant activity.

Intravenous

Rat

114 UG/KG

LD50

Remarks: Nutritional and Gross Metabolic:Weight loss or decreased weight gain. Behavioral:Change in motor activity (specific assay). Sense Organs and Special Senses (Nose, Eye, Ear, and Taste):Eye:Lacrimation.

Intraperitoneal

Mouse

17160 NG/KG

LD50

Intravenous

Mouse

127 UG/KG

LD50

Remarks: Sense Organs and Special Senses (Nose, Eye, Ear, and Taste):Eye:Lacrimation. Behavioral:Change in motor activity (specific assay). Nutritional and Gross Metabolic:Weight loss or decreased weight gain.

Section 142 12 Ecological Information

No data available.

Section 143 13 Disposal Considerations

APPROPRIATE METHOD OF DISPOSAL OF SUBSTANCE OR PREPARATION
Disposal should be made in accordance with existing disposal practices employed for infectious wastes at your institution. Observe all federal, state, and local environmental regulations.

Section 144 14 Transport Information

DOT/DTG

Proper Shipping Name: Toxins, extracted from diving sources, solid, in, on, s.s.
UN #: 3462462
Class: 6.1
Packing Group: I
Hazard Label: Toxic substances.
PIH: Not PIH

IATA/ATA

Proper Shipping Name: Toxins, extracted from diving sources, solid, in, on, s.s.
IATA UN Number: 3462462
Hazard Class: 6.1
Packing Group: I

Section 145 15 Regulatory Information

EU ADDITIONAL CLASSIFICATION

Symbol of Danger: T
Indication of Danger: Toxic.
R: 23/24/25/25
Risk Statements: Toxic by inhalation, in contact with skin and if swallowed.
S: 45-36/37/39/39
Safety Statements: In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). Wear suitable protective clothing, gloves and eye/face protection.

US CLASSIFICATION AND LABEL TEXT

Indication of Danger: Biohazard, Toxic.
Risk Statements: Toxic by inhalation, in contact with skin and if swallowed.
Safety Statements: In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). Wear suitable protective clothing, gloves and eye/face protection.
US Statements: Biomedical material. May cause human disease.
Target organ(s): Pancreas.

UNITED STATES REGULATORY INFORMATION

SARA LISTED: No

CANADA REGULATORY INFORMATION

WHMIS Classification: This product has been classified in accordance with the hazard criteria of the CPR, and the MSDS/SDS contains all the information required by the CPR.
DSL: No

Section 16 Other Information

DISCLAIMER

For Research Use Only. Not for drug, household or other uses.

WARRANTY
