

**The University of Western Ontario**  
**BIOLOGICAL AGENTS REGISTRY FORM**  
**Approved Biohazards Subcommittee: October 14, 2011**  
**Biosafety Website: [www.uwo.ca/humanresources/biosafety/](http://www.uwo.ca/humanresources/biosafety/)**

This form must be completed by each Principal Investigator holding a grant administered by the University of Western Ontario (UWO) or in charge of a laboratory/facility where the use of Level 1, 2 or 3 biological agents is described in the laboratory or animal work proposed. The form must also be completed if any work is proposed involving animals carrying zoonotic agents infectious to humans or involving plants, fungi, or insects that require Public Health Agency of Canada (PHAC) or Canadian Food Inspection Agency (CFIA) permits.

This form must be updated at least every 3 years or when there are changes to the biological agents being used.

Containment Levels will be established in accordance with Laboratory Biosafety Guidelines, 3rd edition, 2004, Public Health Agency of Canada (PHAC) or Containment Standards for Veterinary Facilities, 1<sup>st</sup> edition 1996, Canadian Food Inspection Agency (CFIA).

Electronically completed forms are to be submitted to Occupational Health and Safety, (OHS), (Support Services Building, Room 4190 or to [jstanle2@uwo.ca](mailto:jstanle2@uwo.ca)) for distribution to the Biohazards Subcommittee. For questions regarding this form, please contact the Biosafety Officer at extension 81135 or [biosafety@uwo.ca](mailto:biosafety@uwo.ca). If there are changes to the information on this form (excluding grant title and funding agencies), contact Occupational Health and Safety for a modification form. See website: [www.uwo.ca/humanresources/biosafety/](http://www.uwo.ca/humanresources/biosafety/).

Please ensure that all questions are fully and clearly answered. Failure to do so will lead to the form being returned, which will cause delays in your approval and frustration for you and your colleagues on the Committee.

**If you are re-submitting this form as requested by the Biohazards Subcommittee, please make modifications to the form in bold print, highlighted in yellow. Please re-submit forms electronically.**

PRINCIPAL INVESTIGATOR:	<b>R. Greg Thorn</b>
DEPARTMENT:	<b>Biology</b>
ADDRESS:	<b>3057 BGS (lab) / 3047 (office)</b>
PHONE NUMBER:	<b>x88647</b>
EMERGENCY PHONE NUMBER(S):	<b>519-433-8137</b>
EMAIL:	<b>rgthorn@uwo.ca</b>

Location of experimental work to be carried out :

Building : <b>BGS</b>	Room(s): <b>3057, 3054</b>
Building : _____	Room(s): _____
Building : _____	Room(s): _____

**\*For work being performed at Institutions affiliated with the University of Western Ontario, the Safety Officer for the Institution where experiments will take place must sign the form prior to its being sent to the University of Western Ontario Biosafety Officer (See Section 15.0, Approvals).**

FUNDING AGENCY/AGENCIES: NSERC

GRANT TITLE(S): Ecology and systematics of soil fungi

UNDERGRADUATE COURSE NAME(IF APPLICABLE): \_\_\_\_\_

**Please include a ONE page research summary or teaching protocol in lay terms.  
Forms with summaries more than one page will not be reviewed.**

The focus of my research program is on fungal diversity discovery and the effects of disturbance on diversity and ecosystem function in soil and litter fungi. How many species of fungi are there? Does disturbance influence fungal diversity or community composition? Does fungal diversity or community composition matter - i.e., do disturbed sites have altered ecosystem function as a consequence of changes to the fungal community? Research from my lab shows that, at least in agricultural soils, the richness and diversity of mushroom fungi (Basidiomycota) are greatest in sites of least disturbance, perhaps because the diversity of microhabitats or niches within soil increases with time since disturbance. In contrast, the diversity and richness of arbuscular mycorrhizal fungi (Glomeromycota) is approximately equal in old fields (released from agriculture 4 to 20 years ago) and in pristine or historically-disturbed (>50 years prior) tallgrass prairies. In the latter case, species composition, not richness or diversity, seems to be correlated to disturbance, and this may have implications for attempts to restore tallgrass prairie communities on disturbed sites. We plan to continue to explore the spatial and temporal aspects of fungal diversity in soil, and the links between fungal diversity and ecosystem function. One limitation to our progress in molecular exploration of diversity is the limited number of reference sequences of named species of fungi, especially in certain groups that we encounter frequently: *Hygrocybe*, the *Entomolataceae*, and clavarioid fungi of both the *Agaricales* and *Cantharellales*. We have made progress in targeted collection and sequencing of these fungi, to add to the reference database of sequences available and better identify the environmental sequences obtained from soil community DNA. As such, my research program has components of both systematics and ecology. These studies offer an opportunity to detect the effects of disturbance on communities of soil fungi and on the contribution to soil health that selected community members provide. Our findings will have impact in the areas of sustainable agriculture, forestry, and biological conservation.

Host plants of mycorrhizal fungi are occasionally grown in the greenhouse as "trap cultures": subsamples of soils from experimental sites in Ontario are put in the pots of seedlings as "inoculum" and mycorrhizal symbioses are established over a period of 3-4 months between the host plants and the viable and compatible mycorrhizal fungi in the soil samples. Mycorrhizal fungi are harvested for identification using DNA or morphology, and plants and soils are autoclaved and disposed.

## 1.0 Microorganisms

1.1 Does your work involve the use of biological agents?  YES  NO  
 (non-pathogenic and pathogenic biological agents including but not limited to bacteria and other microorganisms, viruses, prions, parasites or pathogens of plant or animal origin)? If no, please proceed to Section 2.0

Do you use microorganisms that require a permit from the CFIA?  YES  NO

If YES, please give the name of the species \_\_\_\_\_

What is the origin of the microorganism(s)? \_\_\_\_\_

Please describe the risk (if any) of escape and how this will be mitigated:

**We have in the past imported soils from Costa Rica, and obtained CFIA permits for import of these. These soils have been autoclaved and disposed, and the permits have expired. No similar work is being done at this time. Most of the cultures that we obtain from international culture collections are non-pathogenic (thus not subject to permits from CFIA or Health Canada).**

*Please attach the CFIA permit.*

Please describe any CFIA permit conditions:

**The key condition was that we hadle soils in the biosafety hood and autoclave them when completed with experimentation; this was done and no soils remain.**

1.2 Please complete the table below:

Full Scientific Name of Biological Agent(s)* (Be specific)	Is it known to be a human pathogen? YES/NO		Is it known to be an animal pathogen? YES/NO		Is it known to be a zoonotic agent? YES/NO		Maximum quantity to be cultured at one time? (in Litres)	Source/Supplier	PHAC or CFIA Containment Level		
	<input type="checkbox"/> Yes <input type="checkbox"/> No			<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3						
	<input type="checkbox"/> Yes <input type="checkbox"/> No					<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3				
	<input type="checkbox"/> Yes <input type="checkbox"/> No					<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3				
	<input type="checkbox"/> Yes <input type="checkbox"/> No					<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3				
	<input type="checkbox"/> Yes <input type="checkbox"/> No					<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3				
	<input type="checkbox"/> Yes <input type="checkbox"/> No					<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3				
	<input type="checkbox"/> Yes <input type="checkbox"/> No					<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3				
	<input type="checkbox"/> Yes <input type="checkbox"/> No					<input type="checkbox"/> 1 <input type="checkbox"/> 2+ <input type="checkbox"/> 3	<input type="checkbox"/> 2 <input type="checkbox"/> 3				

*\*Please attach a Material Safety Data Sheet or equivalent from the supplier if the bacterium used is not on this link:  
[http://www.uwo.ca/humanresources/docandform/docs/ohs/CFIA\\_Ecoli\\_list.pdf](http://www.uwo.ca/humanresources/docandform/docs/ohs/CFIA_Ecoli_list.pdf)*

Additional Comments:     Please see attached list

## 2.0 Cell Culture

2.1 Does your work involve the use of cell cultures?  YES  NO  
 (If NO, please proceed to Section 3.0)

2.2 Please indicate the type of primary cells (i.e. derived from fresh tissue) that will be grown in culture:

Cell Type	Is this cell type used in your work?	Source of Primary Cell Culture Tissue	AUS Protocol Number
Human	<input type="checkbox"/> Yes <input type="checkbox"/> No		Not applicable
Rodent	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Non-human primate	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Other (specify)	<input type="checkbox"/> Yes <input type="checkbox"/> No		

2.3 Please indicate the type of established cells that will be grown in culture in:

Cell Type	Is this cell type used in your work?	Specific cell line(s)*	Containment Level of each cell line	Supplier / Source of cell line(s)
Human	<input type="checkbox"/> Yes <input type="checkbox"/> No			
Rodent	<input type="checkbox"/> Yes <input type="checkbox"/> No			
Non-human primate	<input type="checkbox"/> Yes <input type="checkbox"/> No			
Other (specify)	<input type="checkbox"/> Yes <input type="checkbox"/> No			

*\*Please attach a Material Safety Data Sheet or equivalent from the supplier. (For more information, see [www.atcc.org](http://www.atcc.org))*

2.4 For above named cell types(s) indicate PHAC or CFIA containment level required  1  2  2+  3

Additional Comments: \_\_\_\_\_

## 3.0 Use of Human Source Materials

3.1 Does your work involve the use of human source materials?  YES  NO  
 If no, please proceed to Section 4.0

3.2 Indicate in the table below the Human Source Material to be used.

Human Source Material	Source/Supplier /Company Name	Is Human Source Material Infected With An Infectious Agent? YES/UNKNOWN	Name of Infectious Agent (If applicable)	PHAC or CFIA Containment Level (Select one)
Human Blood (whole) or other Body Fluid		<input type="checkbox"/> Yes <input type="checkbox"/> Unknown		<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 2+ <input type="checkbox"/> 3
Human Blood (fraction) or other Body Fluid		<input type="checkbox"/> Yes <input type="checkbox"/> Unknown		<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 2+ <input type="checkbox"/> 3
Human Organs or Tissues (unpreserved)		<input type="checkbox"/> Yes <input type="checkbox"/> Unknown		<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 2+ <input type="checkbox"/> 3
Human Organs or Tissues (preserved)		Not Applicable		Not Applicable

Additional Comments: \_\_\_\_\_

**4.0 Genetically Modified Organisms and Cell lines**

4.1 Will genetic modifications be made to the microorganisms, biological agents, or cells described in Sections 1.0 and 2.0?  YES  NO If **NO**, please proceed to Section 5.0

4.2 Will genetic modification(s) involving plasmids be done?  YES, complete table below  NO

Bacteria Used for Cloning *	Plasmid(s) **	Source of Plasmid	Gene Transformed or Transfected	Will there be a change due to transformation of the bacteria?	Will there be a change in the pathogenicity of the bacteria after the genetic modification?	What are the consequences due to the transformation of the bacteria?

\* Please attach a Material Safety Data Sheet or equivalent if available.

\*\* Please attach a plasmid map.

\*\*\*No Material Safety Data Sheet is required for the following strains of *E. coli*:

[http://www.uwo.ca/humanresources/docandform/docs/ohs/CFIA\\_Ecoli\\_list.pdf](http://www.uwo.ca/humanresources/docandform/docs/ohs/CFIA_Ecoli_list.pdf)

4.3 Will genetic modification(s) of bacteria and/or cells involving viral vectors be made?

YES, complete table below  NO

Virus Used for Vector Construction	Vector(s) *	Source of Vector	Gene(s) Transduced	Describe the change that results from transduction

\* Please attach a Material Safety Data Sheet or equivalent.

4.3.1 Will virus be replication defective?  YES  NO

4.3.2 Will virus be infectious to humans or animals?  YES  NO

4.3.3 Will this be expected to increase the containment level required?  YES  NO

**5.0 Will genetic sequences from the following be involved?**

- ◆ HIV  NO  YES, specify
- ◆ HTLV 1 or 2 or genes from any Level 1 or Level 2 pathogens  NO  YES, specify
- ◆ SV 40 Large T antigen  NO  YES
- ◆ E1A oncogene  NO  YES
- ◆ Known oncogenes  NO  YES, specify
- ◆ Other human or animal pathogen and or their toxins  NO  YES, specify

5.1 Is any work being conducted with prions or prion sequences?  NO  YES

Additional Comments: \_\_\_\_\_

Section 5.0 - NO

## 6.0 Human Gene Therapy Trials

6.1 Will human clinical trials be conducted involving a biological agent?  YES  NO  
(including but not limited to microorganisms, viruses, prions, parasites or pathogens of plant or animal origin)  
If no, please proceed to Section 7.0

6.2 If YES, please specify which biological agent will be used:  
Please attach a full description of the biological agent.

6.3 Will the biological agent be able to replicate in the host?  YES  NO

6.4 How will the biological agent be administered?

6.5 Please give the Health Care Facility where the clinical trial will be conducted:

6.6 Has human ethics approval been obtained?  YES, number:  NO  PENDING

## 7.0 Animal Experiments

7.1 Will live animals be used?  YES  NO If NO, please proceed to section 8.0

7.2 Name of animal species to be used

7.3 AUS protocol #

7.4 List the location(s) for the animal experimentation and housing.

7.5 Will any of the agents listed in section 4.0 be used in live animals  
 NO  YES, specify:

7.6 Will the agent(s) be shed by the animal:  
 YES  NO, please justify:

## 8.0 Use of Animal species with Zoonotic Hazards

8.1 Will any animals with zoonotic hazards or their organs, tissues, lavages or other body fluids including blood be used (see list below)?  YES  NO - If NO, please proceed to section 9.0

8.2 Will live animals be used?  YES  NO

8.3 If YES, please specify the animal(s) used:

- |                             |  |                             |
|-----------------------------|--|-----------------------------|
| ◆ Pound source dogs         | <input type="checkbox"/> YES                     | <input type="checkbox"/> NO |
| ◆ Pound source cats         | <input type="checkbox"/> YES                     | <input type="checkbox"/> NO |
| ◆ Cattle, sheep or goats    | <input type="checkbox"/> YES, species            | <input type="checkbox"/> NO |
| ◆ Non-human primates        | <input type="checkbox"/> YES, species            | <input type="checkbox"/> NO |
| ◆ Wild caught animals       | <input type="checkbox"/> YES, species & colony # | <input type="checkbox"/> NO |
| ◆ Birds                     | <input type="checkbox"/> YES, species            | <input type="checkbox"/> NO |
| ◆ Others (wild or domestic) | <input type="checkbox"/> YES, specify            | <input type="checkbox"/> NO |

8.4 If no live animals are used, please specify the source of the specimens:

## 9.0 Biological Toxins and Hormones

9.1 Will toxins or hormones of biological origin be used?  YES  NO If **NO**, please proceed to Section 10.0

9.2 If YES, please name the toxin(s) or hormones(s)  
Please attach information, such as a Material Safety Data Sheet, for the toxin(s) used.

9.3 What is the LD<sub>50</sub> (specify species) of the toxin or hormone

9.4 How much of the toxin or hormone is handled at one time\*?

9.5 How much of the toxin or hormone is stored\*?

9.6 Will any biological toxins or hormones be used in live animals?  YES  NO  
If **YES**, Please provide details:

\*For information on biosecurity requirements, please see:  
[http://www.uwo.ca/humanresources/docandform/docs/healthandsafety/biosafety/Biosecurity\\_Requirements.pdf](http://www.uwo.ca/humanresources/docandform/docs/healthandsafety/biosafety/Biosecurity_Requirements.pdf)

Additional Comments: \_\_\_\_\_

## 10.0 Insects

10.1 Do you use insects?  YES  NO - If **NO**, please proceed to Section 11.0

10.2 If YES, please give the name of the species.

10.3 What is the origin of the insect?

10.4 What is the life stage of the insect?

10.5 What is your intention?  Initiate and maintain colony, give location:  
 "One-time" use, give location:

10.6 Please describe the risk (if any) of escape and how this will be mitigated:

10.7 Do you use insects that require a permit from the CFIA permit?  YES  NO  
If **YES**, Please attach the CFIA permit & describe any CFIA permit conditions:

## 11.0 Plants

- 11.1 Do you use plants?  YES  NO - If **NO**, please proceed to Section 12.0
- 11.2 If YES, please give the name of the species. **Panicum virgatum Solidago canadensis Allium porrum**
- 11.3 What is the origin of the plant? **Ontario**
- 11.4 What is the form of the plant (seed, seedling, plant, tree...)? **Seedling**
- 11.5 What is your intention?  Grow and maintain a crop  "One-time" use
- 11.6 Do you do any modifications to the plant?  YES  NO  
If yes, please describe:
- 11.7 Please describe the risk (if any) of loss of the material from the lab and how this will be mitigated:  
**No risk, native or locally cultivated species**
- 11.8 Is the CFIA permit attached?  YES  NO  
If **YES**, Please attach the CFIA permit & describe any CFIA permit conditions:

## 12.0 Import Requirements

- 12.1 Will any of the above agents be imported?  YES, country of origin **USA, Costa Rica, New Zealand**  
 NO  
If **NO**, please proceed to Section 13.0
- 12.2 Has an Import Permit been obtained from HC for human pathogens?  YES  NO
- 12.3 Has an import permit been obtained from CFIA for animal or plant pathogens?  YES  NO
- 12.4 Has the import permit been sent to OHS?  YES, please provide permit #  NO

## 13.0 Training Requirements for Personnel Named on Form

All personnel named on the above form who will be using any of the above named agents are required to attend the following training courses given by OHS:

- ◆ Biosafety
- ◆ Laboratory and Environmental/Waste Management Safety
- ◆ WHMIS (Western or equivalent)
- ◆ Employee Health and Safety Orientation

As the Principal Investigator, I have ensured that all of the personnel named on the form who will be using any of the biological agents in Sections 1.0 to 9.0 have been trained.

**An X in the check box indicates you agree with the above statement...**   
**Enter Your Name** Greg Thorn **Date:** 16 July 2012

## 14.0 Containment Levels

14.1 For the work described in sections 1.0 to 9.0, please indicate the highest HC or CFIA Containment Level required.  1  2  2+  3

14.2 Has the facility been certified by OHS for this level of containment?  
 YES, location and date of most recent biosafety inspection: **3343 4 June 2012**  
 NO, please certify  
 NOT REQUIRED for Level 1 containment

14.3 Please indicate permit number (not applicable for first time applicants): **Bio-UWO -0068**

## 15.0 Procedures to be Followed

15.1 Are additional risk reduction measures necessary beyond containment level 1, 2, 2+ or 3 measures that are unique to these agents?  YES  NO  
If **YES** please describe:

15.2 Please outline what will be done if there is an exposure to the biological agents listed such as a needlestick injury or an accidental splash:  
**Immediately wash and consult physician**

15.3 As the Principal Investigator, I will ensure that this project will follow the Western Biosafety Guidelines and Procedures Manual for Containment Level 1 & 2 Laboratories (and the Level 3 Facilities Manual for Level 3 projects). I will ensure that UWO faculty, staff and students working in my laboratory have an up-to-date Hazard Communication Form, found at <http://www.shs.uwo.ca/workplace/workplacehealth.html>

**An X in the check box indicates you agree with the above statement...**   
**Enter Your Name** Greg Thorn **Date:** 16 July 2012

15.4 Additional Comments: **Section 12: No permits currently held for importation. Non-pathogenic fungal cultures imported are not subject to permit/notification requirements of CFIA, Health Canada, nor Evt Canada.**

16.0 \_\_\_\_\_

## Approvals

**Subject:**Re: Fwd: Re: Biological Agents Registry Form - Thorn

**Date:**Mon, 16 Jul 2012 20:53:43 -0400

**From:**Greg Thorn <rgthorn@uwo.ca>

**To:**Jennifer Stanley <jstanle2@uwo.ca>

**CC:**rgthorn@uwo.ca

Hi Jennifer:

Thanks - yes, a couple of check-marks self-deleted or got missed somehow. Section 15.4 does not accept much text, but I squeezed in what I could there. Yes, the majority by far of my cultures were brought with me in 2000; the next big lot of them were imported from Costa Rica under various permits in 2001-2007, and a few were imported recently from the US and New Zealand, but CFIA, Health Can and Env't Can determined they were not subject to permit or notification requirements.

So, here's version 3.

Cheers,

Greg
