

Per the Laboratory Biosafety Guidelines, Public Health Agency of Canada, 3<sup>rd</sup> edition, 2004, Section 3.1.2:

“Visitors, maintenance staff, janitorial staff and others, as deemed appropriate, must also be provided with training and/or supervision commensurate with their anticipated activities in the containment area”

Permit Holder: \_\_\_\_\_

Building and Room Number: \_\_\_\_\_

I have read and understood the Biosafety Awareness document. I will not work with biohazards in the laboratory, as this requires additional general and specific biosafety training.
