

Ad-hoc Environment/Laboratory Safety Committee Meeting
Monday, April 14, 2008

Present: K. Baines, G. Barbe, P. Charpentier, K. Galil, G. Kidder, R. Maslen, J. McMullin, A.M. McCusker, R. Poole, G. Qubty, V. Smith, J. Stanley

Regrets: A. Belisle, K. Griffiths, J. McMullin

- 1.0 The ad-hoc meeting was called to discuss new information that could effect a change to the controls recommended by the committee for the green building.
- 2.0 G. Kidder talked about the history of the nanotechnology and the ELSC and the decision to treat nanolabs in the green building like biosafety L2
- 3.0 P. Charpentier gave an overview of nanotechnology and use of fumehoods vs biosafety cabinets. Different types of containment were discussed. Paul showed the committee a brochure from California Nanosystems Institute, UCLA.
- 4.0 Action: G. Qubty to contact UCLA to find out the type of hoods they are using.
- 4.0 There was no other business.
