# Diversified Equity Fund Review

November 2, 2012

November 2, 2012

# Agenda

- Goal
- Strategy
- Decisions
  - Select investment strategies
  - Asset mix
  - Currency hedging
  - Small cap VS Large cap
  - Active VS Passive
  - Canadian equity component
  - EAFE Component
- Simulations
- Timeline

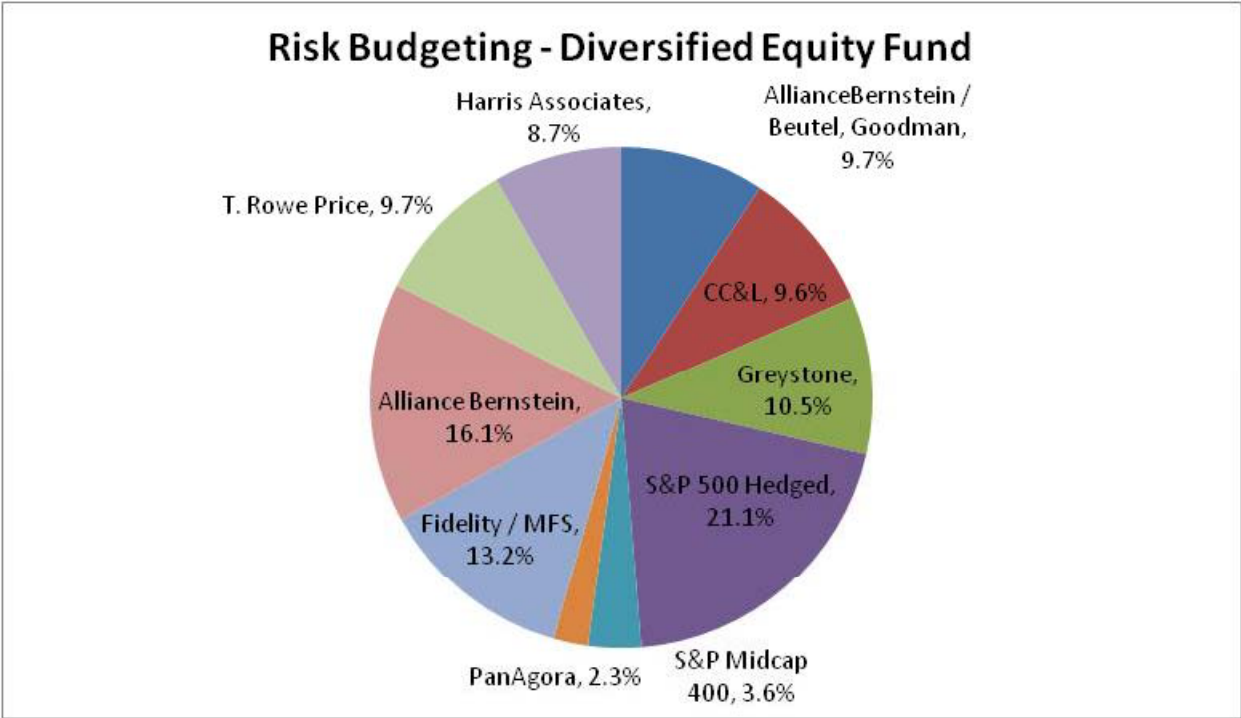

# Goal

- Optimize the Diversified Equity Fund by increasing its expected return and/or reducing its volatility.

# Diversified Equity Fund Performance

	Annualized Returns as of August 31, 2012					
	1-Yr	2-Yr	3-Yr	4-Yr	5-Yr	10-Yr
Diversified Equity Fund	3.52%	4.78%	3.71%	-1.74%	-3.48%	4.28%
Benchmark	4.56%	6.44%	5.34%	-0.36%	-2.24%	4.02%
Value Added	-1.04%	-1.66%	-1.63%	-1.38%	-1.24%	0.27%
	Volatility as of August 31, 2012					
	1-Yr	2-Yr	3-Yr	4-Yr	5-Yr	10-Yr
Diversified Equity Fund	14.32%	12.71%	12.39%	16.81%	15.77%	13.23%
Benchmark	12.97%	11.67%	11.61%	16.28%	15.31%	12.80%
Difference	1.35%	1.04%	0.78%	0.54%	0.46%	0.43%

# Risk Attribution

# Strategy

1. Capture sources of additional return
2. Add diversifiers to the portfolio to lower the risk of the portfolio

# Decisions

# Decisions

1. New investment strategies
2. Asset mix of the fund
3. Currency hedging strategy
4. Small cap VS large cap allocation
5. Active VS passive strategy
6. Canadian equity component
7. EAFE equity component

# Investment Strategies

# Investment Strategies

1. Capture sources of additional return
  - Global small cap equities
  - Emerging markets equities
  - Private equity
  - Active currency management
  - Global tactical asset allocation
2. Add diversifiers to the portfolio to lower the risk of the portfolio
  - Low volatility equity strategies
  - Commodities
  - Market neutral strategies
  - Long/short equities
  - Real estate
  - Infrastructure

# Pros & Cons

Strategy	Pros	Cons
Global small cap equities	<ul style="list-style-type: none"> <li>•Higher expected return than large cap stocks</li> <li>•Lower correlation with large cap stocks</li> <li>•Greater potential for active management</li> </ul>	<ul style="list-style-type: none"> <li>•Higher volatility</li> <li>•Less liquid</li> <li>•Higher investment management fees</li> <li>•Higher transaction costs</li> <li>•Current valuation levels less attractive</li> </ul>
Emerging markets equities	<ul style="list-style-type: none"> <li>•Emerging markets are a source of growth for the global economy</li> <li>•Market capitalization of emerging markets is growing</li> <li>•Likely flow of investments may grow opportunity and liquidity</li> <li>•Diversifier to developed markets</li> <li>•Potential for higher returns</li> <li>•Attractive investment opportunities for companies located therein</li> <li>•Attractive demographics</li> <li>•Emergence of middle class</li> <li>•Enormous pool of cheap labour</li> <li>•Stronger fiscal positions</li> </ul>	<ul style="list-style-type: none"> <li>•Increases portfolio risk</li> <li>•Lower liquidity</li> <li>•Higher investment management fees</li> <li>•Higher transaction costs</li> <li>•Increasing correlations with developed markets</li> <li>•Inconsistent legal and regulatory framework</li> <li>•Transparency</li> <li>•Stronger GDP growth does not necessarily translate into stronger stock market performance</li> </ul>

# Pros & Cons

Strategy	Pros	Cons
Low volatility equity strategies	<ul style="list-style-type: none"> <li>•Historically higher returns and lower volatility than traditional portfolios</li> <li>•Low fees</li> <li>•Research suggests that anomaly may persist</li> <li>•Can be implemented in a passive way</li> </ul>	<ul style="list-style-type: none"> <li>•Large tracking error</li> <li>•Outperformance may not re-occur in the future</li> <li>•Short history for products on the market</li> <li>•May experience extended periods of underperformance</li> </ul>
Commodities	<ul style="list-style-type: none"> <li>•Low correlation with traditional asset classes</li> <li>•Strong demand expected for natural resources and commodities</li> <li>•Provide an inflation hedge</li> <li>•Higher alpha generation potential</li> </ul>	<ul style="list-style-type: none"> <li>•Commodities don't generate any income</li> <li>•Returns based on supply and demand; limited profit potential</li> <li>•Non-traditional investment</li> <li>•Volatile returns</li> </ul>

# Asset Mix

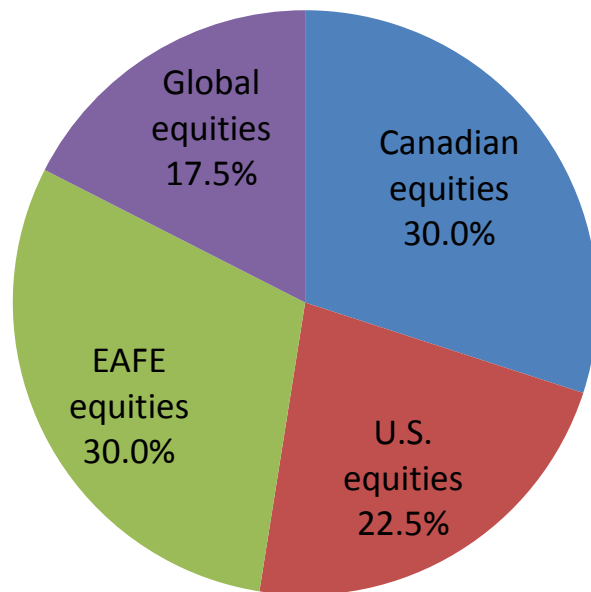

# Diversified Equity Fund Composition

Investment Manager	% of the Fund	Asset Class	Manager Style
Greystone Managed Investment	10.0%	Canadian Equities	Active-Growth

# Asset Mix Comparison

As of August 31, 2012

## MSCI World All-Country Index

## MSCI World AC ex-Canada

# Equity Funds of Funds Asset Mix

	Average	Median	Max	Min	Diversified Equity Fund
Canadian equity	44.2%	40.1%	72.2%	21.8%	30.0%
U.S. equity	13.4%	14.1%	27.8%	0.0%	17.5%
EAFE equity	12.8%	13.7%	35.6%	0.0%	30.0%
Global equity	16.3%	13.7%	64.7%	0.0%	17.5%
Emerging markets equity	3.3%	4.5%	15.0%	0.0%	0.0% <sup>1</sup>
Small Cap	5.8%	5.0%	23.1%	0.0%	5.0%
Real estate	2.1%	0.0%	10.5%	0.0%	0.0%
Infrastructure	1.1%	0.0%	12.5%	0.0%	0.0%
Commodity	0.9%	0.0%	9.3%	0.0%	0.0%

<sup>1</sup> The Diversified Equity Fund exposure to emerging markets was 4.9% as of June 30, 2012 when the emerging markets investments in the global equity and EAFE equity mandates are included.

# Potential Rebalancing Guidelines

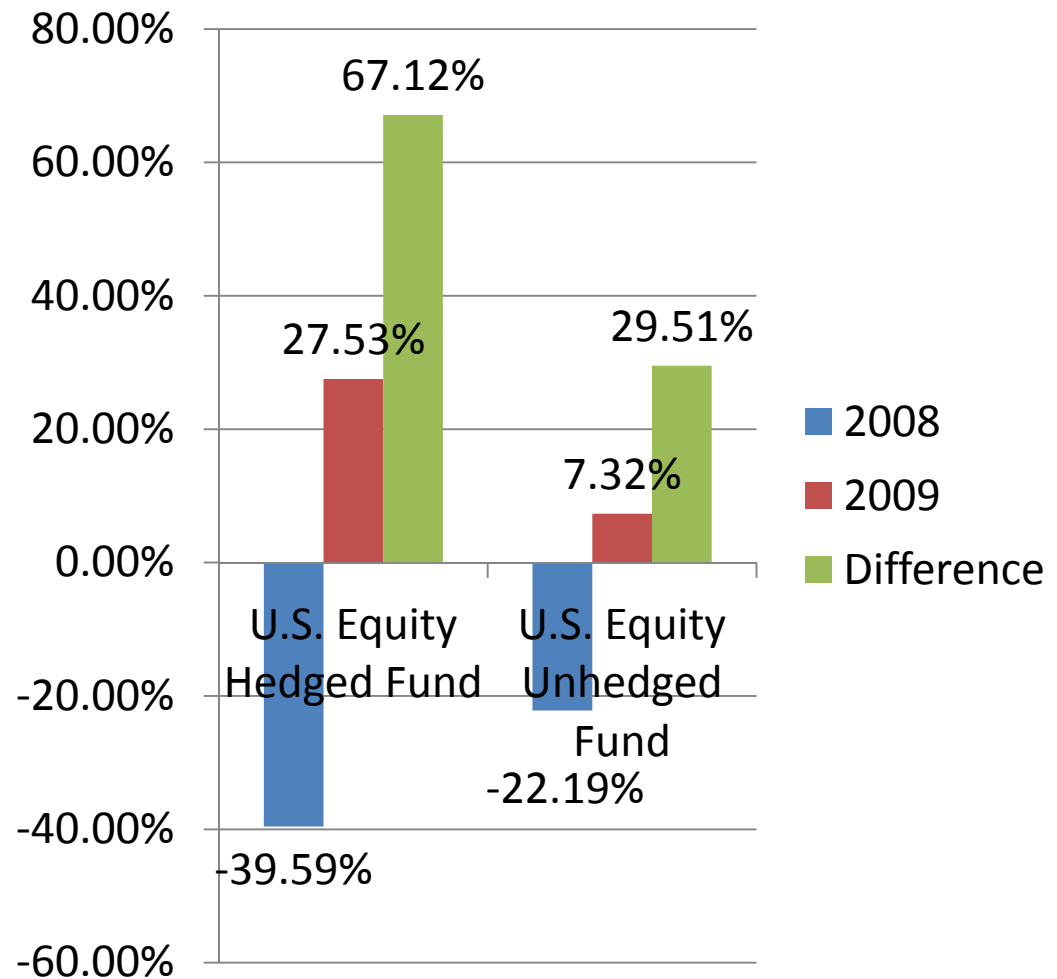

- Leave Canadian equity at 30%
- U.S. / EAFE mix should reflect world equity markets mix of 49.7% / 50.3%
- Private equity and global commodities should fit in the global equity sleeve
- Emerging markets equity is included in the total EAFE allocation
- Minimum 5% allocation to any strategy
- Maximum 10% allocation for illiquid strategies
- Focus on global equity versus U.S. / EAFE

# Currency Hedging

## Currency Hedging Strategy

- The U.S. equity large cap and U.S. equity mid cap strategies, which account for 20% of the Fund, are 100% currency hedged
- The U.S. equity small cap strategy, which accounts for 2.5% of the Fund, is not currency hedged
- The global and EAFE equity strategies, which account for 47.5% of the Fund in total, are not currency hedged

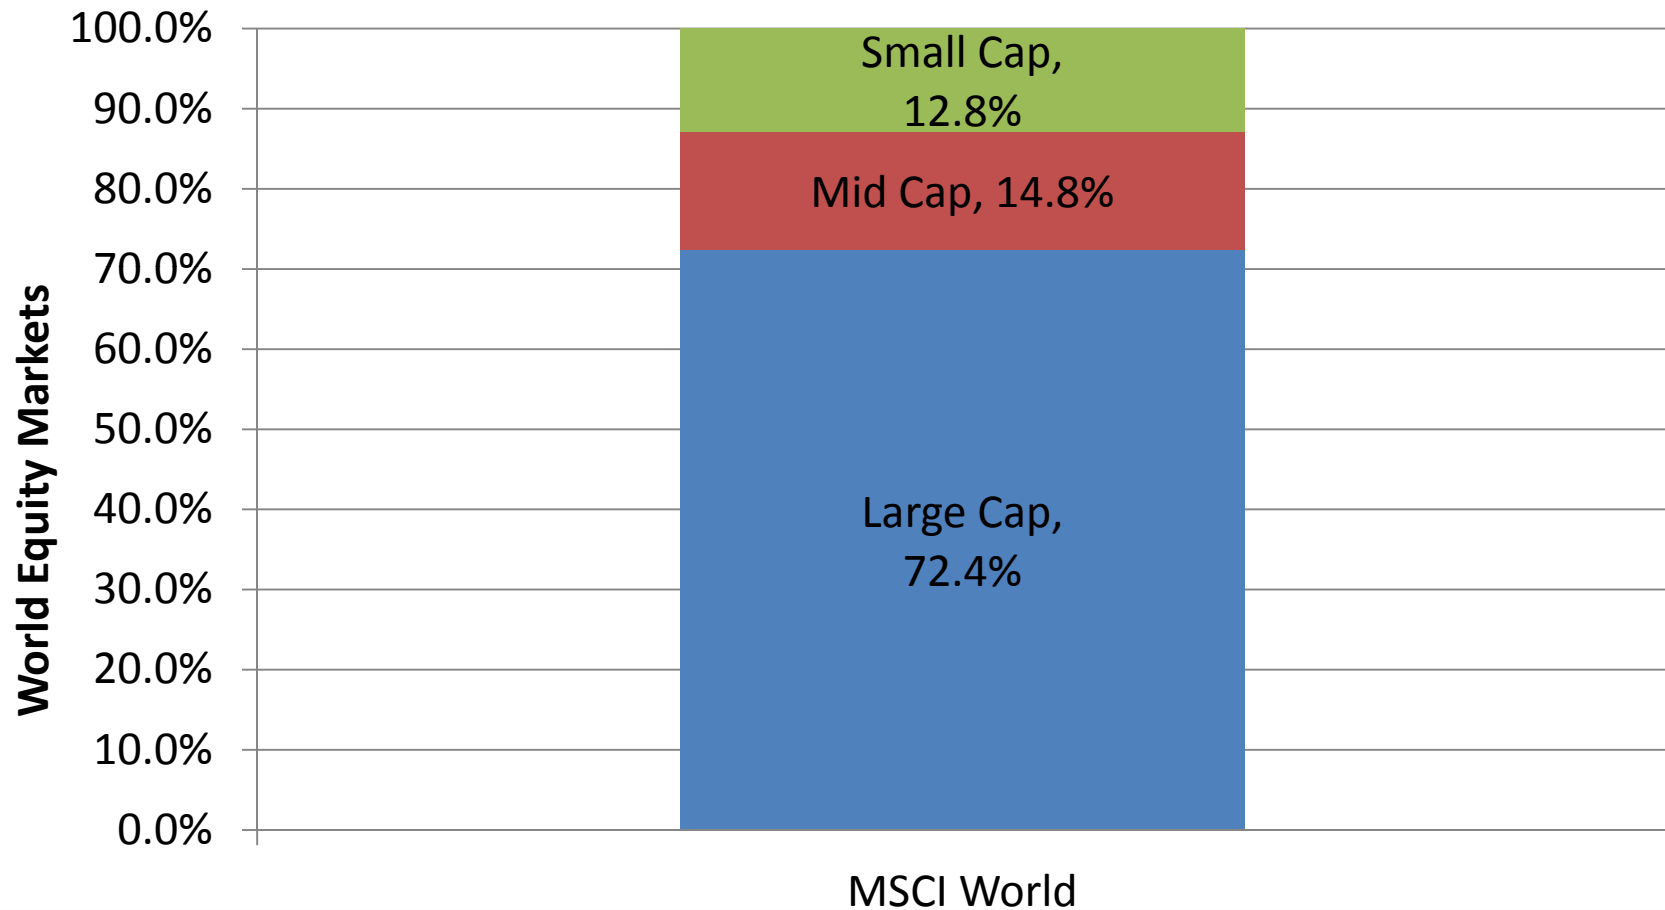

## Is currency hedging reducing portfolio volatility?

# Small Cap VS Large Cap

# World Markets Breakdown

Source: MSCI August 2012

# Active VS Passive Management

# Active VS Passive Management

# Canadian Equity Component

# Canadian Equity

Existing Components	Potential Additions
Bottom-up core strategy (CC&L)	Low-volatility strategy
Bottom-up value strategy (Beutel, Goodman)	Small-cap strategy
Bottom-up growth strategy (Greystone)	Top-down approach

# EAFE Equity Component

# AllianceBernstein's Status

	Reason to Terminate	Status
Personnel	Departure of the two lead portfolio managers: Kevin Simms and Henry D'Auria	Negative trend: Although both are still at AllianceBernstein in similar capacities, the firm restructured earlier in the year and Kevin is now the only lead portfolio manager on the strategy and Henry D'Auria focuses on emerging markets equity, including the portion that our fund invests in. The fact that Kevin Simms is not Director of Value Research anymore is a positive development though.
	Investment analyst pool going down dramatically	Negative trend: The number of value analysts has gone down by about 15% from previous highs. They are still adequately staffed compared to peers though.
Organization	Firm facing financial difficulties	No issue: Although the firm recorded a loss of \$93 million in 2011, it was due to a one-time non-cash deferred compensation charge of \$587 million. Cash flow from operations are still positive at \$146 million.
	Firm in the process of being sold or liquidated	No issue
Investment Process	Deviation from investment process	No change
	Significant portfolio turnover as a result of poor decisions	Annual portfolio turnover of 20% - 30%
Performance	Extremely poor performance	Negative trend. Significant underperformance, even when compared to other value managers.
	No outperformance when value spreads compress	No issue
Other	Strategy downgraded to terminate by Russell	No change

# Performance Comparison

1991–1996	273.3	+108.4%

# Even a Sideways Value Market Should Yield Improved Performance

## Value Performance Is Cyclical

## Underperformance Has Been Unusually Severe

Value Factor Performance*	Global Value	
	Quarterly Relative Return†	No. of Qtrs. Last Five Years
Best Third	+3.3%	4
Neutral Third	+0.6	2
Worst Third	(2.3)%	14

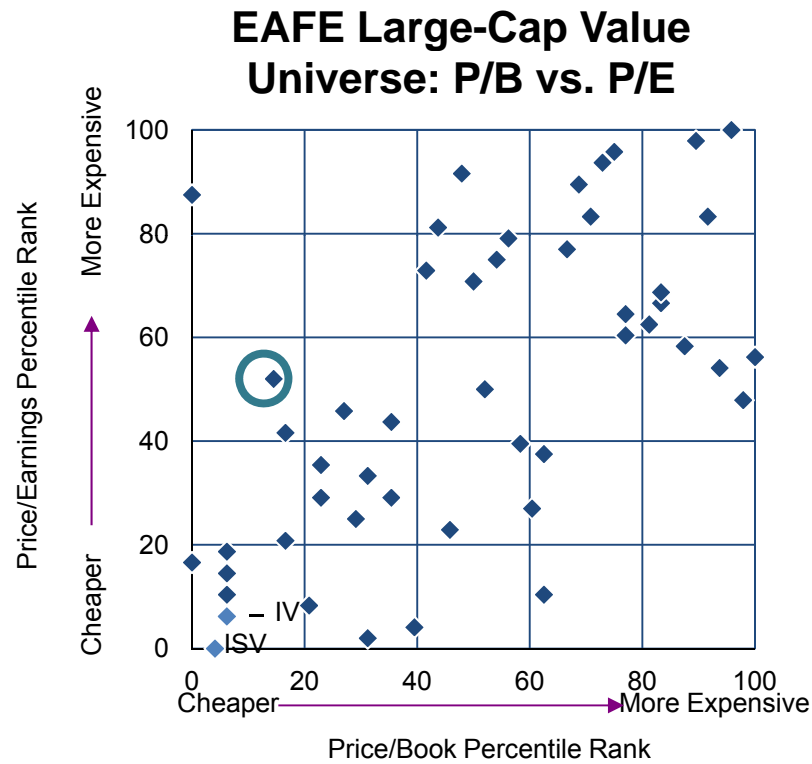

70% of Quarters

\*Rolling-three-year returns of a composite of half the lowest quintile of Bernstein global stock universe based on price/book value and half the lowest quintile of price/trailing earnings

\*\*Defined as the top, middle and bottom one-thirds of total return distributions for the lowest minus highest quintile of stocks in the Bernstein global universe based on price/book, from January 1, 1971 to September 30, 2012.

†Average quarterly returns of a representative Global Value account versus the MSCI World since September 1995 inception, hedged in USD. Past performance is no guarantee of future results.

# Value Chart

# Simulations

# Simulations

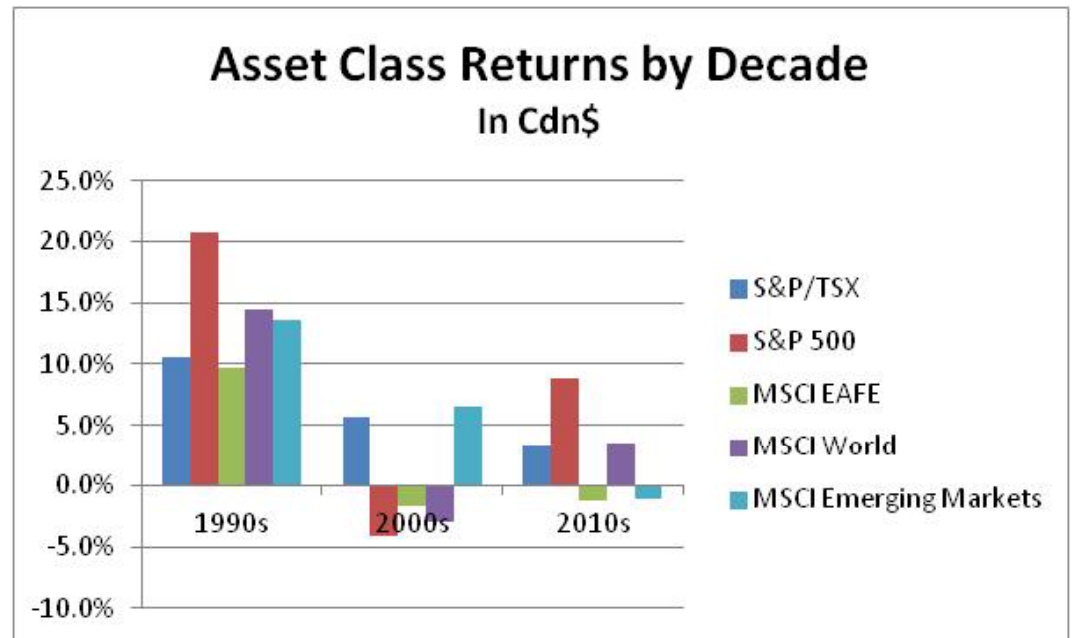

- Historical manager returns
  - From January 2007 to August 2012
- Historical index returns
  - From January 2002 to August 2012
- Mean-variance optimization
  - 10-yr strategic returns, standard deviations and correlation coefficients provided by Russell Investments

# Joint Pension Board Feedback

- Members generally not comfortable with commodities
- Members relatively comfortable with low-volatility equity, global small cap equity and emerging markets equity
- Issues:
  - Low volatility equity: 20% may be too high given the short history of the strategy
  - Global small cap equity: concerns about timing of entry
  - Emerging markets equity: concerns about timing of entry and existing exposure to emerging markets

## Timing of Entry

- Higher expected returns when valuations are cheap
- Cheap valuations occur when there's controversy and negative sentiment
- See article: "Equity Perspectives: Global Equities – Disappointment, Volatility and Opportunity" by Scott Berg of T. Rowe Price

# Potential Portfolios

Portfolio	Details
9	Reducing allocation to EAFE equity, adding global small cap equity, adding global low volatility equity
10	Reducing allocation to EAFE equity, replacing 50% of U.S. equity with U.S. low volatility equity, adding emerging markets equity, adding global small cap equity
11	Reducing allocation to EAFE equity, replacing 50% of U.S. equity with U.S. low volatility equity, adding emerging markets equity
12	Reducing allocation to EAFE equity, adding low-volatility equity to Canadian equity component, adding emerging markets equity, adding global small cap equity

# Historical Manager Returns

- For the period January 2007 to August 2012
- Returns are gross of fees
- New strategies don't assume any value added from active management
- Substantial increase in returns, reduction in volatility and increase in Sharpe ratio for all proposed portfolios

Portfolio	Expected Return	Volatility	Sharpe Ratio
Existing Portfolio	-1.47%	14.66%	-0.226
Portfolio 9	-0.45%	13.46%	-0.171
Portfolio 10	0.10%	13.67%	-0.128
Portfolio 11	0.37%	13.94%	-0.106
Portfolio 12	-0.17%	13.88%	-0.146

# Historical Index Returns

- For the period January 2002 to August 2012
- Returns are gross of fees
- New strategies don't assume any value added from active management
- Increase in returns, reduction in volatility and increase in Sharpe ratio

Portfolio	Expected Return	Volatility	Sharpe Ratio
Existing Portfolio	3.25%	12.98%	0.072
Portfolio 9	3.53%	12.28%	0.099
Portfolio 10	3.89%	12.60%	0.125
Portfolio 11	3.69%	12.50%	0.110
Portfolio 12	3.82%	12.79%	0.117

# Mean-Variance Optimization

•Based on Russell’s Strategic Planning Assumptions

•Caveats:

- Russell has no parameters for small cap equity and low-volatility equity
- Parameter used for low-volatility equity assumes lower return than traditional equity, which is very conservative

Portfolio	Expected Return	Volatility	Sharpe Ratio
Existing Portfolio	6.74%	18.12%	0.239
Portfolio 9	6.70%	18.05%	0.238
Portfolio 9*	6.78%	18.01%	0.243
Portfolio 10	6.74%	18.14%	0.239
Portfolio 10*	6.83%	18.14%	0.244
Portfolio 11	6.73%	17.97%	0.241
Portfolio 11*	6.82%	17.97%	0.246
Portfolio 12	6.77%	18.45%	0.237
Portfolio 12*	6.83%	18.45%	0.240

\* Assuming that the low-volatility equity returns are the same as traditional equity
