***Investment Style – International Equity***

The University invests in AllianceBernstein International Diversified Value strategy for the Diversified Equity Fund, the Diversified Equity Fund B and the Non-North American Equity Fund. The two Diversified Equity Funds invest in securities that must be listed on prescribed stock exchanges, while there's no such restriction for the Non-North American Equity Fund and as such it may invest in emerging markets equities.

AllianceBernstein uses a bottom-up value approach. The firm looks for companies suffering from temporary troubles whose stocks are selling at a discount. They use a combination of quantitative and fundamental research to determine a company's long-term earnings power. Their quantitative approach involves looking at price multiples such as price-to-earnings and price-to-book ratios, but also success factors such as return on equity, price momentum and earnings revisions. Their fundamental research involves finding what went wrong and determining whether the company can recover. They do this by conducting interviews with company management, suppliers and competitors.

<sup>1</sup> AllianceBernstein gives the University a 10% discount on fees for the Global Bond Fund because of the multiple mandates we have with them.

<sup>2</sup> The portfolio has been managed according to the current guidelines since February 2007.

***Investment Style – Global Fixed Income***

The University invests in a global fixed income portfolio that has a target mix of 50% Canadian bonds and 50% non-Canadian bonds. AllianceBernstein uses fundamental and quantitative research to find opportunities. Fundamental research involves reviewing an issuer's credit rating and assessing a particular industry. Quantitative research involves comparing valuations and finding the best combination of bonds. They seek to add value through security selection, sector allocation (choosing between federal, provincial and corporate bonds), country/yield curve selection and currency selection.
