Western University, London, Ontario, Canada

Tuberculosis

Bovine Tuberculosis

Zoonotic Tuberculosis

10 million incident cases worldwide~1.4 million deaths

Largely neglected disease worldwide

Lack of routine surveillance/improper diagnosis & treatment

Objectives, Methodology, Significance

1. Evaluate current **capacities, logistics, and infrastructure** in place for diagnosis and treatment
2. Evaluate **knowledge, attitudes, and practices**

- 10 PRIORITIES FOR ADDRESSING ZONOTIC TB**
- IMPROVE THE SCIENTIFIC EVIDENCE BASE**
1. Collect and report more complete and accurate data
 2. Improve diagnosis in people
 3. Address research gaps
- REDUCE TRANSMISSION AT THE ANIMAL-HUMAN INTERFACE**
4. Ensure safer food
 5. Improve animal health
 6. Reduce the risk to people
- STRENGTHEN INTERSECTORAL AND COLLABORATIVE APPROACHES**
7. Increase awareness, engagement and collaboration
 8. Develop policies and guidelines
 9. Implement joint interventions
 10. Advocate for investment

“Strengthen Intersectoral and Collaborative Approaches”

- STRENGTHEN INTERSECTORAL AND COLLABORATIVE APPROACHES**
7. Increase awareness, engagement and collaboration
 8. Develop policies and guidelines
 9. Implement joint interventions
 10. Advocate for investment

- Questionnaires to:
1. 25 healthcare facilities
 2. 75 healthcare workers
