1. Objectives of this professional development course:

Writing for Success in Graduate School and Beyond I course will develop graduate students' skills and competencies in writing. It will introduce students to the fundamentals of English grammar and provide them with the tools to write clear, correct, and accessible academic prose. Emphasis will be placed on the basic principles of effective academic writing and on establishing a foundation that will allow students to develop into confident academic writers.

Students will complete a series of short assignments modeled on the abstracts and lay abstracts required for graduate theses, and give one short presentation.

The course is open to all disciplines. It is ideal for students who need to acquire a basic understanding of English grammar, who need to improve their foundational writing skills, and who would like to polish their writing skills.

By the end of the course, you will have learned the basics of English grammar, improved your editing/proofreading skills, improved your writing skills, practiced your presentation skills, learned how to present your research to a general audience, and completed an abstract and a lay abstract.
