Ethics for a Digital World

Antirequisites: Phil 2998 (F/W 2019-20), Phil 2268

TOPICS

We spend a considerable portion of our lives in the digital world. What moral considerations ought to guide our conduct as cyber-citizens, given the possibility that online behaviour is morally distinct from real world behaviour? This class will engage materials that address the philosophical issues raised by these two questions: Specifically: What's the relationship between our virtual identities and our physical identities? How is online activity changing our interpersonal relationships? What are our rights and responsibilities toward others in the cyber-world? How do we trade between the potentially conflicting values of anonymity and accountability? How do we balance copyright claims against demands for open access? Is piracy always wrong? Does a hacker's code of ethics make any sense? How should we respond to forms of hate and exclusion in online communities?

TEXTS

All the readings for this course will be made available through OWL

OBJECTIVES

The primary objective of this course is to help students improve their critical thinking skills. Specifically, students should expect to improve their abilities to understand the arguments made in the readings and respond with arguments of their own in their online discussion posts, their online participation, and their term papers.

The secondary goal of the course is to familiarize students with recent attempts by scholars to identify and address the ethical issues that emerge in our increasingly digital lives. This goal will be satisfied by testing student comprehension of the materials with online quizzes, and on the final exam.

REQUIREMENTS
Quizzes: 15% (11 multiple choice quizzes, worth 1.36% each)
Discussion Posts: 30% (two 400 – 600 word posts, worth 15% each)

2. Late Assignments and penalties
