COURSE DESCRIPTION

This course is a study of philosophical approaches to evil through the history of modern Western philosophy. We will consider evil as a theological problem (i.e., the problem of evil, optimism, and philosophical attempts at theodicy and objections to these), the origin and significance of suffering, and philosophical responses to the fact of evil and suffering, especially pessimism (the view that this is the “worst of all possible worlds”).

LEARNING OUTCOMES

Students successfully completing this course should be able to:

- (1) **explain** the views of some of the principal philosophers of the modern period (1500-1900) in Western philosophy on the course topics;
- (2) **appreciate the significance** of the contributions of a diverse set of philosophers (including many outside of the current philosophical canon) to philosophical treatments of evil, suffering, and pessimism
- (3) **identify, analyse, and evaluate** complex philosophical arguments
- (4) **construct** effective written assignments that develop and engage with a philosophical position
