DESCRIPTION
This course is an introduction to various political and ethical issues that arise when considering the function and practice of the media. These include: What is ethical theory and what, in particular, are the duties and responsibilities of those engaged in disseminating information? What is the relation between the media and the market? Is the news a mere commodity? Is the mass media a “propaganda machine” representing the commercial interests of the property class? Or is the media an instrument of democracy, a “fourth estate” fostering the pursuit of truth and objectivity? What are the foundations and limits of freedom of the press in a liberal society? What is the role of the media in the formation of social, civic and moral space? Do we live in a post-truth world and how is this related to the phenomenon of fake news? What might it mean to say that our experiences are mediated and how in a globalized world do such mediations construct and make possible the appearance of distant others? What risks and promises do these mediations pose for the other? What, for instance, is the connection between the media and political violence or between the media and minorities? What role can the media play in the construction of a just moral order? And why does the globalization of news give rise to a rethinking of the principles of journalism ethics?
