

Guidance Document	Health Canada REB Attestation Form
Effective Review	Delegated & Full Board
Version Date	January 15, 2017

The Health Sciences Research Ethics Board (HSREB) does not sign the Health Canada REB Attestation Form. The HSREB uses an Ethics Approval notice that contains the required attestation as per Health Canada regulations and this should be used by the Sponsor in lieu of the Health Canada REB Attestation form. It is the responsibility of the local Investigator to retain this approval notice and provide a copy of this form to the Sponsor if requested.
