

Total Funding for Research Security: **\$773,783**

For Fiscal 2026-2027

Eligible expense category	Institutional performance objective	Indicator	Outcomes (Investment of Research Security Funds)	Outcomes reported at year-end
Strengthening research security capacity. Funding allocation: <b style="color: #2c3e50;">\$433,478	Enhance and mature research security programming by fully enabling government guidelines and regulations.	The availability and adoption of training modules and guidelines, along with the establishment of a cross-functional team to guide the integration of research security processes into existing workflows.	Researchers are equipped to navigate increasingly complex international research environments, while safeguarding Canada's national interests.	
Eligible expense category	Institutional performance objective	Indicator	Outcomes (Investment of Research Security Funds)	Outcomes reported at year-end
Secure research data storage environment – planning, procurement and deployment. Funding allocation: <b style="color: #2c3e50;">\$224,301	Infrastructure is in place for research data management and protection.	Acquisition of appropriate platform(s) for research data management and security.	Research data is managed, stored and secured efficiently and effectively.	
Eligible expense category	Institutional performance objective	Indicator	Outcomes (Investment of Research Security Funds)	Outcomes reported at year-end
Information Resources to Support Research Security at Hospital Research Institutes: <b style="color: #2c3e50;">\$116,004	Upgrades to a research data management platform and introduction of a learning management system to enhance research data security.	Adoption and ease of use of updated platform and new system.	Research data is managed, stored and secured efficiently and effectively.
