Statistics 1023B (Statistical Concepts)  
and  
Statistics 2037B (Statistics for Health)  
Winter 2018 Course Syllabus

**Calendar Description**

An examination of statistical issues aiming towards statistical literacy and appropriate interpretation of statistical information. Common misconceptions will be targeted. Assessment of the validity and treatment of results in population and scientific media. Conceptual consideration of study design, numerical and graphical data summaries, probability, sampling variability, confidence intervals and hypothesis tests.

**Prerequisites:** none  
**Anti-requisites:** For students registered in Statistical Sciences 2037, the anti-requisite is Statistical Sciences 1023A/B. For students registered in Statistical Sciences 1023, the anti-requisites is Statistical Sciences 2037A/B.

You may not receive credit if you lack a pre-requisite OR have taken an anti-requisite course. Unless you have either the requisites for this course or written special permission from your Dean to enrol in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

**Course Information**

**Mondays:** 2:30 to 3:30 pm, NS 7  
**Wednesdays:** 2:30 to 4:30 pm, NS 7.

**Instructor Information**

<table>
<thead>
<tr>
<th>Lecturer</th>
<th>Jennifer Waugh</th>
</tr>
</thead>
<tbody>
<tr>
<td>Departments</td>
<td>Biology and Statistical &amp; Actuarial Sciences</td>
</tr>
<tr>
<td>Drop-in hours*</td>
<td>Tuesdays, 9:30 am–11:30 am in Collip 114</td>
</tr>
<tr>
<td>Email</td>
<td>Use OWL messages only (contact ‘Instructor Role’) - <strong>not</strong> UWO email</td>
</tr>
</tbody>
</table>

*Any additional help sessions or drop-in hours before tests/exams, as well as any change to regular drop-in hours (these may need to be rescheduled from time to time), will be posted to OWL announcements. Please note that individual appointments will not be scheduled outside drop-in hours unless you have *direct timetable conflicts* with the entire drop-in period.

**Communicating with the Instructor**

Use the OWL Messages (to ‘Instructor Role’) tool when asking a personal administrative question (i.e. confidential questions about marks, participation, progress, absences, etc.) that requires a brief response; course content related questions or non-personal questions should be posted to the OWL course Forums. You can expect a response to an OWL message to the instructor or a posting to the Forum within ~48 hours during the work week (during busy times, it may take a little longer). **Note that Messages or Forum questions will not be answered within the 24-hour period before the tests or exams**, nor can I guarantee responses over weekends/holidays. This ‘black-out’ period is not meant to...
be punitive; it is meant to encourage students to be proactive in seeking help and preparing for assessments.

Students are responsible for checking OWL (http://owl.uwo.ca) on a regular basis for news and updates. This is the primary method by which information will be disseminated to all students in the class.

**Course Objectives**

By the end of this course, a successful student will be able to:

- Understand and correctly use foundational vocabulary associated with statistics;
- Interpret, create (with the aid of suitable applets), and critically evaluate graphical and numerical summaries;
- Understand and appreciate probability, chance, randomness, and ‘average’;
- Understand, assess, and critique the validity of conclusions of statistical studies;
- Critically evaluate statistical information presented in the media and society;
- Apply concepts learned in this course to future courses, careers, and everyday life.

**Required Materials**

Students will be expected to read small sections of the textbook; note that this does not require a student to purchase their own copy. There are multiple copies of the textbook available on course reserve at Taylor Library for your use. More information about textbook use in this course is available on the OWL course site under ‘Administration’. Students are encouraged to read this information before purchasing the textbook.

**Important Information**

1. **If you would like to make an audio recording of the lectures/tutorials in this course, you MUST ask permission first** (through OWL Messages sent to ‘Instructor Role’). According to intellectual property laws, not asking permission constitutes stealing. I will NOT permit videotaping lectures under any circumstances.

2. **Course material (i.e. lecture slides, videos, quizzes, practice, and actual exam questions and other supplementary material posted on OWL) is the intellectual property of your instructor and is made available to you for your personal use in this course.** Sharing, posting, selling, or using this material outside of your personal use in this course is considered an infringement of intellectual property rights. Outline lecture slides will be posted in .pdf format, 1 slide per page only, no later than 11:59 pm the night before lecture. Alternative file formats will not be available.

3. **The Forum tool is enabled on the OWL website.** Please use this Forum to post and respond to questions about course content (e.g., lecture, readings, practice questions, etc). The Forum will be monitored on a regular basis and the instructor will interject with corrections or responses as necessary. As this is an open Forum, please be respectful of your peers, instructor(s), and TAs. Derogatory, discriminatory, or otherwise inappropriate language or topics will be removed and dealt with at the instructor’s discretion.
Assessment and Evaluation

Your final grade will automatically be calculated to give you the highest mark possible based on the following grade breakdown:

<table>
<thead>
<tr>
<th>Course Component</th>

</tbody>
</table>

*see information below regarding the ‘No Risk’ and ‘Low-Risk’ aspects of these course components.

Course Structure Quiz: A quiz administered through OWL Test &Quizzes, assessing understanding of course policies and structure as described in this course syllabus and the OWL course website. More detailed information about structure and content of this quiz is provided on the course website. No accommodation will be made after the deadline for any reason (e.g., technical problems or late registration in the course); attempt the quiz early during the availability period so that any problems that arise can be dealt with before the deadline.

Review Quizzes: Short quizzes administered through OWL Test & Quizzes, assessing understanding of course material, with a purpose of reviewing relevant content for upcoming lectures/topics. More detailed information about structure and content of each quiz will be provided on the course website as the quizzes become available. No accommodation will be made after the deadline for each quiz for any reason (e.g., technical problems); attempt the quiz early during the availability period so that any problems that arise can be dealt with before the deadline.

The review quizzes are not intended to represent the level of difficulty or comprehension involved in in-class assessments, midterm, or exams.

Quizzes are graded for correct answers; a student’s individual mark on a quiz will equal the number of ‘points’ collected towards the Preparation Quiz mark. At the end of the course, the total number of ‘points’ a student has accumulated will be tallied, and expressed as a percentage out of the total number of points ‘offered’ across all quizzes presented during the course. This percentage of points collected by the student will be used to determine the student’s final Review Quiz mark (out of 4%) for the course.

Surveys: Brief questionnaires administered through OWL Test & Quizzes, typically involving no previous knowledge of course material or statistics. The purpose of these Surveys is to collect data to be discussed or analyzed during lectures or for independent work. Surveys are graded based on completion with reasonable/logical responses, rather than for correct answers. More detailed information about structure and content of each Survey will be provided on the course website as they become available. Note that the majority of the Surveys will be administered early in the term. No accommodation will be made after the deadline for each Survey for any reason (e.g., technical problems).
Each Survey will be assigned a specific number of ‘points’ (generally based on the number of questions involved) for students to collect. At the end of the course, the total number of ‘points’ a student has accumulated will be tallied, and expressed as a percentage out of the total number of points ‘offered’ across all Surveys presented during the course. This percentage of points collected by the student will be used to determine the student’s final Survey mark (out of 2%) for the course.

**Assignments:** Two (2) short, written assignments involving application and analysis of course material will be assigned during the course, and collected using the ‘Assignments’ tool on the OWL course site. Detailed instructions on the structure, grading scheme, and submission process for the assignments will be posted on the OWL site. There will be no assignment extensions or make-up assignments for any reason. If you are unable to submit an assignment by the due date/time, you must obtain accommodation from Academic Counseling in your Faculty’s Dean’s Office; those students obtaining such accommodation will have the weight(s) of the missed assignment(s) shifted to the final exam. Failure to obtain academic accommodation for a missed due date will result in a grade of 0% for the Assignment(s).

**No-Risk In-class Assessments:** There will be three (3), multiple choice, roughly exam-level difficulty In-class Assessments administered throughout the course (see the course schedule on the last page of this syllabus for dates). The assessments will be completed using IFaT cards (“Immediate feedback assessment technique” scratch cards) during class time, at the start of lecture. More detailed information about structure and content of each Assessment, as well as information about using IFaT cards, will be provided on the course website. These In-class Assessments are subject to the ‘Flexible Grading’ scheme presented below; as a result, there are no make ups or accommodations for absences for students who miss the In-class Assessments (for any reason). The Assessments

**Low Risk Midterm:** One cumulative multiple-choice (Scantron based) midterm will be administered in person, during class time. This midterm assesses understanding and application of course material. More detailed information about structure and content of this midterm will be provided on the course website. Students who miss the Midterm must request accommodation from Academic Counseling in their Faculty’s Dean’s Office. Students who obtain appropriate accommodation may be eligible for an alternative seating of the Midterm.

**Final Exam:** The Final Exam is a cumulative, 3-hour multiple choice (Scantron based) and short-answer questions exam assessing understanding, application, and integration of course material (from both Independent Study and Face-to-Face sessions) across the entire course. More detailed information about structure and content of these tests will be provided on the course website. The exam will be held during the official final exam period and will be scheduled by the Registrar’s Office. Do not book travel (or other plans) during this exam period until the exam schedule is finalized by the Registrar’s Office.

**Additional comments on assessments**

**Flexible grading**
The No-Risk In-class Assessments (“ICA”), Low-Risk Midterm, and Final Exam have flexible weightings, dependent on your success for each component. Each assessment is initially worth a set amount of your final grade (see table on page 3). Eight (8) scenarios have been provided for how the weights of the In-class Assessments will be allocated. For each of the eight scenarios, there are also two options (A or B) for the weight of the Low-Risk Midterm and Final Exam. Your final course grade will automatically be calculated under each of the following scenarios for both options A and B (i.e. your final course grade will be calculated 16 different ways); whichever scenario/option combination gives you the highest final course grade will be used when submitting your course grade:
The purpose behind the Flexible Grading scheme is to provide you with the entire term to demonstrate your mastery of the material and skills. That is, if you are not as successful as desired on earlier assessments, their individual weightings can be reduced (as described in the above Scenarios), and the remaining weights be placed on later assessments (e.g. Final Exam). These alternative distributions are possible because all assessments in this course are cumulative.

**General comments**

Non-programmable calculators are permitted for use during all graded components of the course. No other aids are allowed (unless otherwise noted). **Cellular phones, iPods, and other similar technology are not permitted in the midterm/exam rooms.** This means that cellular phones, iPods, and other similar technology cannot be used as a timekeeper/clock, calculator, or for any other purpose.

It is Faculty of Science policy that a student who chooses to write a test or exam deems themselves fit enough to do so, and the student must accept the mark obtained. Claims of medical, physical, or emotional distress after the fact will not be considered.

The Course Structure Quiz, Review Quizzes, Surveys, In-Class Assessments, Assignments, Low-Risk Midterm, and Final Exam will not be re-weighted (beyond what is described in this syllabus) to accommodate perceived poor performance on any assessment in this course, nor for any absence(s) for which accommodation has not been recommended by Academic Counseling. Additional assignments will not be accepted in lieu of a missed or lost graded component, or to account for perceived poor performance on any graded component of this course.

No special rounding rules (e.g. to meet GPA cut-offs, minimal requirements for programs/continuation, etc.) are applied in this course when calculating final grades. There are no exceptions to this policy.

**Policy for missed Tests/Exams**

If you are unable to meet a course requirement due to illness or other serious circumstances, you must provide valid medical or supporting documentation to the Academic Counselling Office of your home faculty as soon as possible. If you are a Science student, the Academic Counselling Office of the Faculty of Science is located in WSC 140, and can be contacted at scibmsac@uwo.ca.

For further information, please consult the university's medical illness policy at [http://www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_medical.pdf](http://www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_medical.pdf)

If you miss the Final Exam, please contact your faculty’s Academic Counselling Office as soon as you are able to do so. They will assess your eligibility to write the Special Exam (the name given by the university to a makeup Final Exam).
You may also be eligible to write the Special Exam if you are in a “Multiple Exam Situation” (see http://www.registrar.uwo.ca/examinations/exam_schedule.html).

Students who miss a graded component in this course and do not receive appropriate accommodation from their Dean’s Office will be awarded a ‘0’ for that component unless otherwise described above. This applies to the Midterm, Assignments, Quizzes, Surveys, and Final Exam. Refer to the above descriptions of the other assessment components for exceptions to this policy (i.e. in-class assessments).

Classroom Environment

The Department of Statistical and Actuarial Sciences has adopted a "Mutual Expectations" policy governing the classroom environment and all work submitted by students. The full text of the policy can be found at: http://www.stats.uwo.ca/modules/undergraduate/index.php?id=12. In summary, the policy was developed under the premise that all interactions between students and faculty should be governed by the principles of courtesy, respect and honesty.

Academic Policies

The website for Registrarial Services is http://www.registrar.uwo.ca

In accordance with policy, http://www.uwo.ca/lts/identity/activateonstudent.html, the centrally administered e-mail account provided to students will be considered the individual’s official university e-mail address. It is the responsibility of the account holder to ensure that e-mail received from the University at his/her official university address is attended to in a timely manner.

Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at this website: http://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_undergrad.pdf.

Computer-marked, multiple-choice tests and exams may be subject to submission for similarity review by software that will check for unusual coincidences in answer patterns that may indicate cheating.

During tests/exams, proctors will inspect all personal belongings on your desk (and even your baseball cap if you are wearing one). If any items are discovered that are not permitted (e.g. any electronic device other than a non-programmable calculator, or notes) they will be confiscated and the incident will be officially reported as an academic offence. Proctors have the discretion to move students between desks during the Tests or Exam periods.

Support Services

Please contact the course instructor if you require lecture or printed material in an alternate format or if any other arrangements can make this course more accessible to you. You may also wish to contact Services for Students with Disabilities (SSD) at 661-2111 ext. 82147 if you have questions regarding accommodation.

The policy on Accommodation for Students with Disabilities can be found here: www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_disabilities.pdf
The policy on Accommodation for Religious Holidays can be found here:
http://www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_religious.pdf

Learning-skills counsellors at the Student Development Centre (http://www.sdc.uwo.ca) are ready to help you improve your learning skills. They offer presentations on strategies for improving time management, multiple-choice exam preparation/writing, textbook reading, and more. Individual support is offered throughout the Fall/Winter terms in the drop-in Learning Help Centre, and year-round through individual counselling.

Students who are in emotional/mental distress should refer to Mental Health@Western (http://www.health.uwo.ca/mental_health) for a complete list of options about how to obtain help.

Additional student-run support services are offered by the USC, http://westernusc.ca/services

**Clicker Use in this Course**

A “clicker” is a browser page or ‘app’ opened on a personal WiFi device (e.g. a smartphone, tablet, or laptop). In class, instructors can ask a variety of structured questions to which you may respond by pressing the appropriate button on your device. Individual responses are collected and summarized in a graph at the front of the room. If the instructor chooses, individual responses may also be saved for future analysis.

In 1023/2037, clickers will be used primarily to promote engagement and evaluate student understanding during class; no grades will be attached to participation with a clicker.

**Clicker Responsibility:** We subscribe to and use clicker software produced by iClicker (https://www.iclicker.com/) because it is the company supported by the Western’s technology services. A student choosing to use a clicker will be responsible for (a) bringing their own device to use as a clicker, and (b) setting up their iClicker account correctly (see information on OWL).

**Clicker Academic Record:** Your clicker use will be recorded in lecture and will become part of your academic record. As such, your clicker record will be afforded the same degree of security, confidentiality and transparency that is customary for test marks, etc.

**Research:** Your clicker data will not be used for any non-academic or research purpose without your consent. For any research study in which you are invited to participate, you will be provided with a Letter of Information with an opportunity to give or withhold consent. Such research will not replace the usual end of term Course Evaluation given by the University.
# Course Schedule

This is a tentative schedule for the course. Watch OWL announcements and in-class announcements for any important updates to the course schedule.

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic(s)</th>
<th>Important Dates/Reminders</th>
</tr>
</thead>
</table>
| Jan 8-12   | 1. Introduction to course  
              2. Statistics and data                                                |                           |
| Jan 15-19  | Summarizing Data I  
              1. Measures of shape, centre, & spread; 5-number summary  
              2. Interpreting & evaluating descriptive statistics             | Thurs, Jan 18: Course Structure Quiz                               |
| Jan 22-26  | Summarizing Data II  
              1. normal distributions & standardized scores; graphical summaries  
              2. applying the empirical rule; misleading graphs               |                           |
| Jan 29-Feb 2 | Sampling Strategies and Study designs  
                          1. vocabulary and designs for sampling & studies  
                          2. selection bias, confounding, & principles of experimental design | Wed, Jan 31: In-class Assessment 1                                 |
| Feb 5-9    | (i) Survey design and (ii) Ethics  
                          1. variation and surveys  
                          2. measurement bias; catch-up from Sampling and Study Design    |                           |
| Feb 12-16  | Research Ethics  
              1. Introduction to core Canadian principles and consent in ethics  
              2. issues with consent and equity                               | Wed, Feb 14: In-class Assessment 2                                 |
| Feb 19-23  | Reading Week (no classes)                                                 |                           |
| Feb 26-Mar 2 | Wed. Feb 28: Low-Risk Midterm                                           |                           |
| Mar 5-9    | Relationships between quantitative variables  
                          1. correlation coefficient; linear regression models  
                          2. interpreting correlations & regression                         |                           |
| Mar 12-16  | Relationships between qualitative variables  
                          1. introduction to two-way tables, risks, & odds  
                          2. interpreting and working with risks & odds statements         | Fri. Mar 16: Assignment 1 due                                      |
| Mar 19-23  | Understanding randomness & probability  
                          1. interpretation of probability, expected value  
                          2. Understanding randomness and working with probability rules   |                           |
| Mar 26-30  | Introduction to inference & interpreting confidence intervals  
                          1. Sampling variability & sampling distributions  
                          2. properties of sampling distributions; confidence intervals    | Wed, Mar 28: In-class Assessment 3                                 |
| Apr 2-6    | Hypothesis testing and significance  
                          1. Hypothesis testing vocabulary & process  
                          2. Chips Ahoy! Hypothesis test; power, effect size, type I/II errors | Fri. Apr 6: Assignment 2 due                                      |
| Apr 9-13   | Capstone: Critiquing Statistics in the media  
                          1. Seven critical components  
                          2. Application of seven critical components                      |                           |
| Apr 14-30  | April Final Exam Period                                                   |                           |
